What's New

Your pedigree in the Cloud

- Upload pedigree data to compustam-cloud.nl to view them anywhere in the world in 2020

File

Online Back-up and restore to new part my Compustam-Cloud

Pigeons

New menu-item replace country codes **new from version 2019 and higher**

Results

- Search for best performance of brothers and sisters of a pigeon
- When exchanging pedigree data, the best results add to comments
- Search for best pigeons can be searched simultaneously in several directions
- Performance per pigeon show all levels simultaneously

Print options

- Stamps with pigeon picture in each pigeon compartment
- For font card the font style is adjustable for ring number, pigeon name, breed, and breeder
- Two free fields on the basis card for e-mail address and website for example
- In pedigree cards, pigeon name, breed and breeder can be printed in a different color Hen screen

Pigeon screen

- in pedigree card 3 generations and 4 generations extra are the fields of the first 2 generations enlarged with 6 extra rules
- When introducing new pigeons, country code is automatically fetched Id. with the standard country code
- In screen Pigeons selection in the loft

Pair and breeding

- List row by batch can be sorted by date Ei-1
- If importing young pigeon in breeding data already exists, an error message is displayed with which coupling number, bin number and round number this hears
- Function in the 'File' menu and screen-breeding-breeding to update the box and loft in pigeon data
- When inserting a pair, the loft and bin number is updated in pigeon file
- In case of couples searching for shortened ring number of father and mother

Important notice Compustam 2018 release 9.13 and higher

the settings required for the Compustam version from release 9.12+.

land notatie: Dutch (Netherlands)

short date note: **dd-MM-yyyy**

these settings must be adjusted for (Re) installation
profit sum 9. Then there are no more problems with importing old ones
version. not even if you do not index or have an older update
Compustam for Windows 7.09 or 8.02 instead of Compustam for Windows
7.21 or 8.09.

after import the possible message **tdDuif** can be ignored,
close the program and restart. and the error message
stays away.

pay attention to extra mention than after installation the offered performances
cannot be read in. (the old version "import" option does not disappear)

See the following topics where the solution is described
per operating system

Error messages in Compustam 2020 and Windows 8.1

Error messages in Compustam 2020 and Windows 10

This problem can also occur if you want to make a backup or like you
to request performance

Important restart the PC or laptop or it will not work!!

installation of Compustam digital download

Have you purchased a new version or an upgrade from Compustam then you have received an email from Compuclub with your registration from Compustam new about this is that from now on there is a link to the Compustam **Setup** (version 9) has been added to the registration form

You can click on [this link](#) and it will be downloaded and if you use Windows 7 to Windows 10 uses Street Setup in the Downloads folder

There are several ways to get to the folder downloads

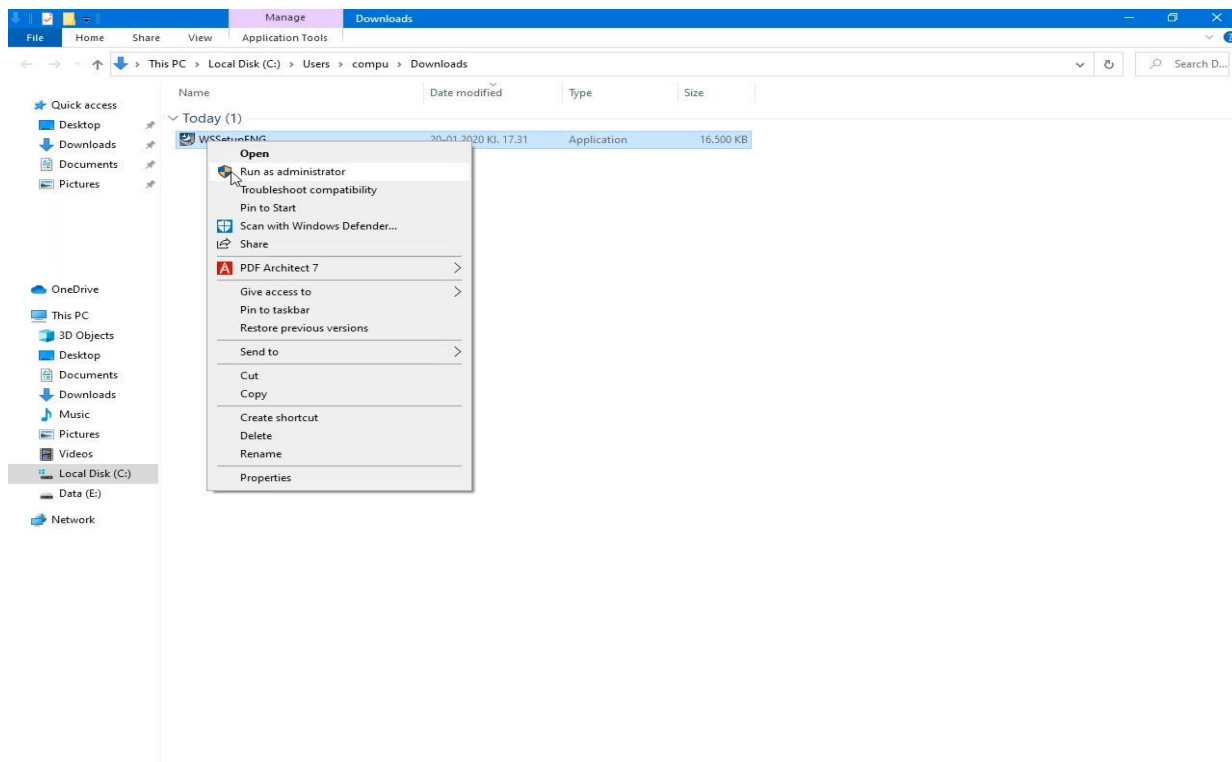

1

Click on the

and at the top left is the Downloads folder

With the Compustam Setup file go to the Setup file and this right click and "Run as administrator and the installation becomes started

Update January 20, 2020 if you use the newest edge browser, switch off the smart screen and go to Downloads and swits on ' Ask where to save each file before downloading

installation of Compustam digital download

The 2nd way is via the web browser that you use

In Chrome

It's at the bottom of the window

In IE en Edge

It's at the bottom of the window

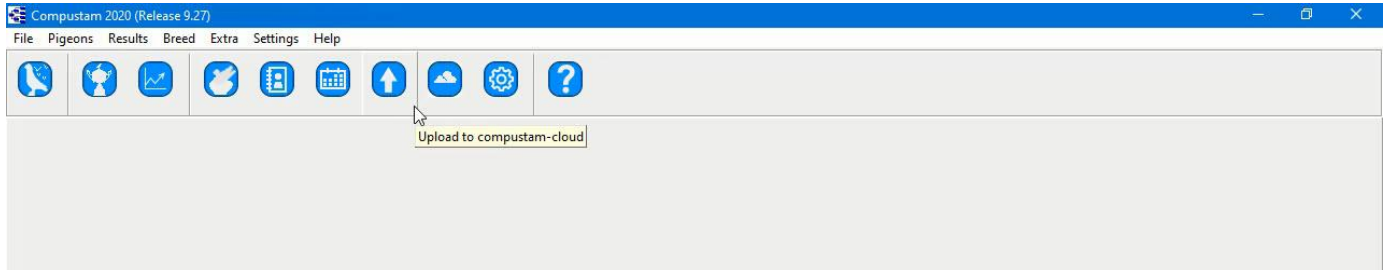

In Firefox

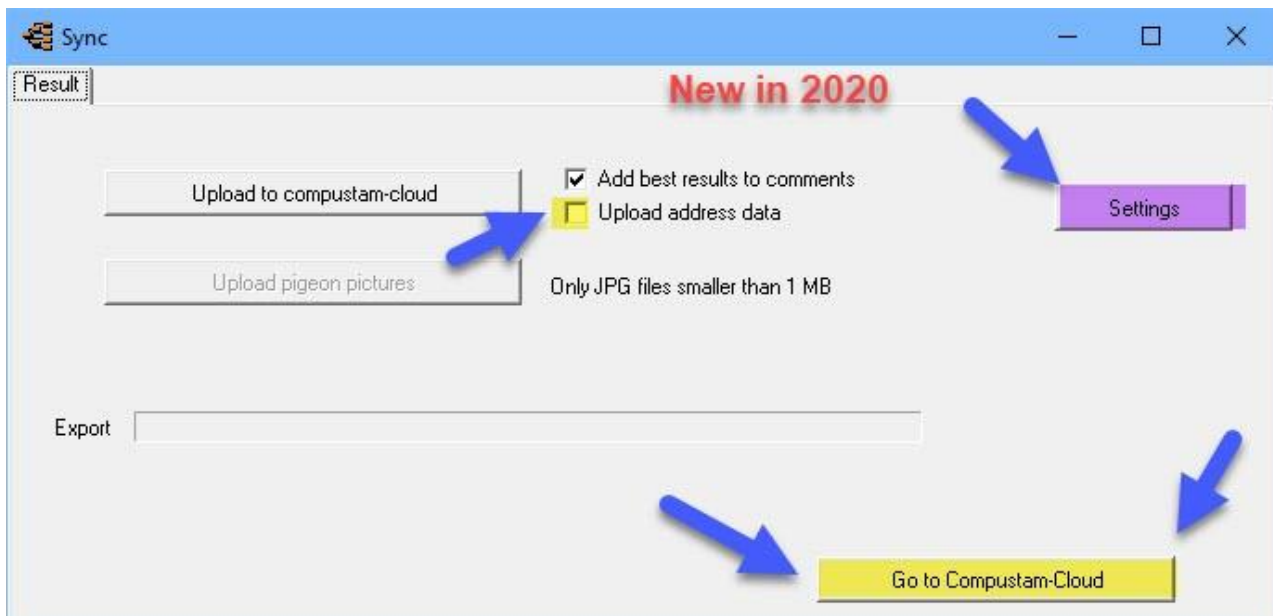

from the toolbar

Compustam Cloud

From Compustam 2017 there is a new component in Compustam included the possibility to upload your pedigree data to Compustam Cloud. With this the Compuclub takes the next step. This development will be done in steps, first we offer you the viewing of your Stam cards, wherever you are. From Compustam 2020 click on

The screen below appears

Click on Upload to Compustam Cloud

- You can also set a check mark for Upload address data, then the family tree data is uploaded to Compustam Cloud

Important: You can upload the pedigree data here, please note that you have to upload the pigeon photos separately to Compustam-cloud after uploading your pedigree data after Compustam-cloud afterwards uploading pigeon photos active

New in Compustam 2020: Settings to to new Users settings menu Cloud

Go to Compustam cloud

Compustam Cloud

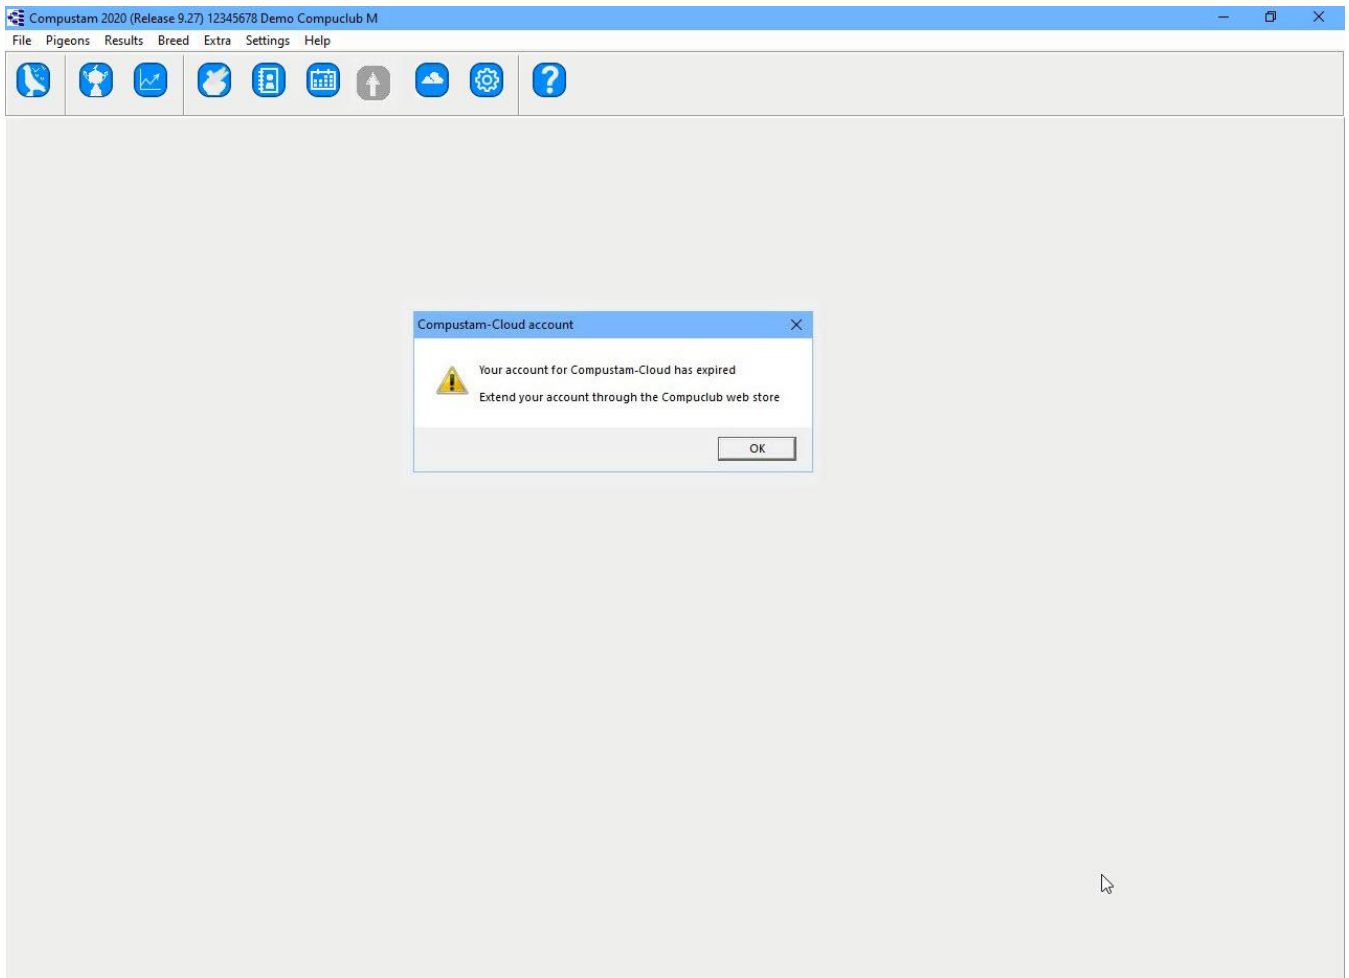

To use Compustam cloud you need a Username and password. These are provided to You by the Compuclub if you have Compustam 2020. Compuclub uses the email address you used when you purchased a new or upgrade license. If you did not receive an email for Compustam cloud, do not forget to look in the folder of junk email or spam and put the email address in your address book so that you can If you are logged in in Compustam cloud you will find a comprehensive manual there

Important to know before Uploading your data to Compustam cloud Your Compustam Cloud family tree data are overwritten every time Eg. if you have 100 pigeons in Compustam-cloud and you remove 5 pigeons from the pigeon data from Compustam 2020 and then upload again to Compustam cloud there are only 95 pigeons in Compustam cloud that sounds logical but you manage your pigeons in Compustam 2020 on your PC or laptop, money is actually what money always makes first backups of your data on eg a USB stick and save your registration data well Do not know how to make a backup on a USB stick

A Backup or restore to a USB flash drive How do you do that?

FAQ

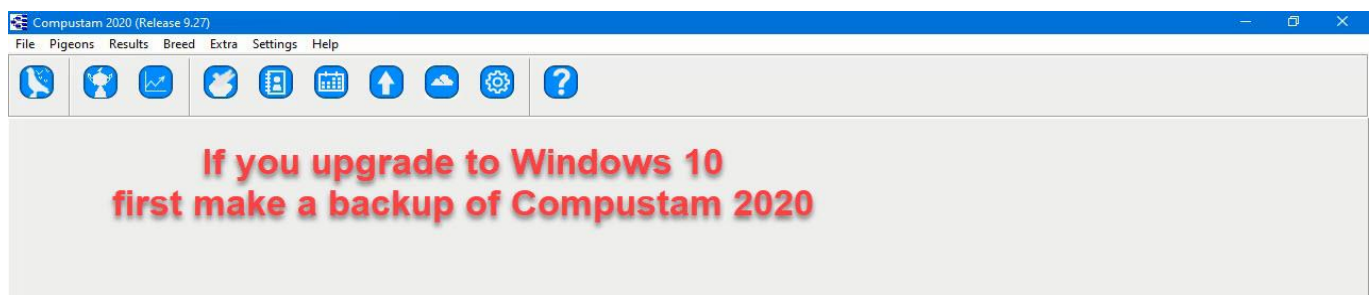

You must install the latest version of Compustam on the same PC laptop where your current (older) Compustam version is

If you have purchased a new PC laptop with Windows 10 to replace, for example, your old Windows 7 PC laptop, you must first install the latest Compustam version on your old PC laptop, otherwise the import will **not work**

Microsoft Windows 7 ends support on Januari 14 2020

toolbar with shortcuts

There is a handy toolbar in Compustam 2020 You make your choice by clicking on the image You can still use the menu items but the relevant components of Compustam 2020.

Installation Compustam 2020

Both new and existing Compustam users should first install the latest version of Compustam 2020 ***only applies if you have received an installation CD**

Installation with CD-ROM

if you order a wwn upgrade from the 2020 season, it will be delivered on a USB stick unless it is delivered (order) is digital)

Before installing, first place the Compustam 2020 CD in your CD-DVD player. Automatically start an installation program. * Do not start this automatically within 30 seconds. Then follow the following steps. ** In Windows 7 (from desktop), click U on Start Button Click on Computer and go to the Compustam installation CD open it (right-click and choose Open. (In Windows 7 you can also click Run after Open type UE: \ setup)

**Windows 7 t/m Windows 10
Press buttons**

To open the run command

If your CD-DVD player has a different letter, replace E with the letter of your CD-DVD player then click OK. Now the Compustam 2020 installation begins

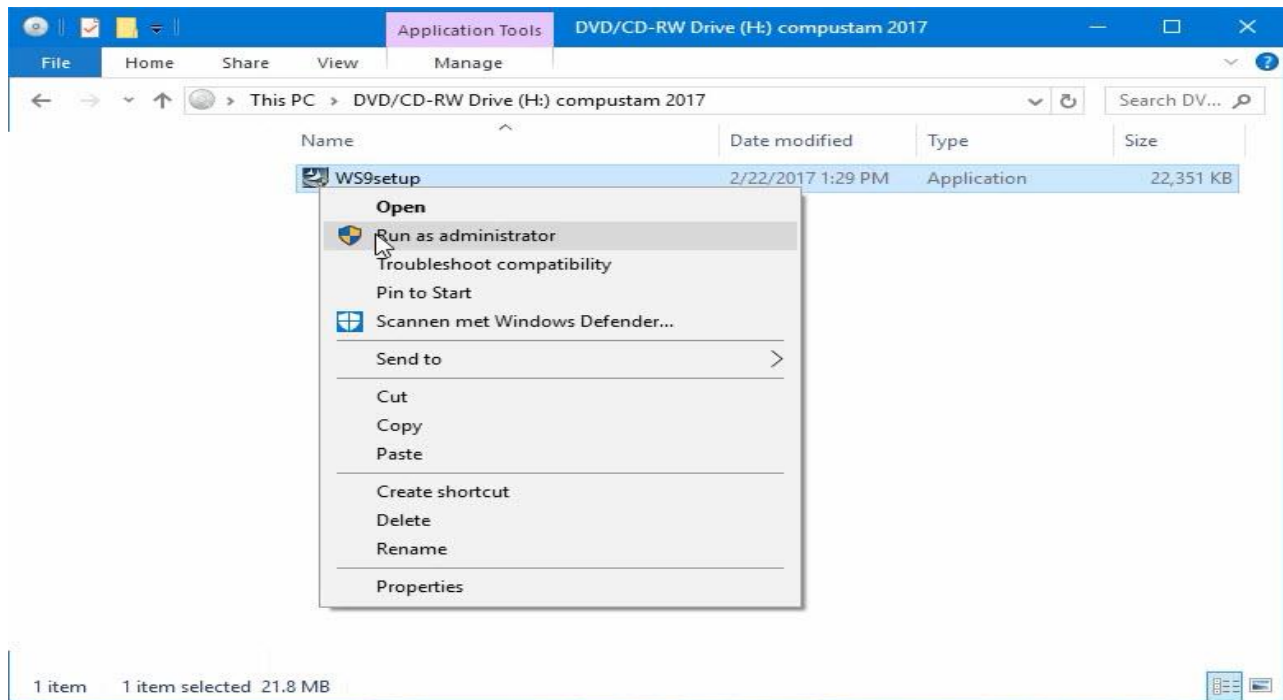

Important: Make sure your login to Windows 8.1 T/M Windows 10 with **administrator rights** than you have permission to remove or install Windows programs

Installation Compustam 2020

Note: before importing the old version, it is wise to check the files in this version first indexing via menu item File indexing files

If you receive error messages during Compustam 2020 (re) installation, you can try the following if you have Windows 8.1 to Windows 10 on your PC or laptop.

If the installation CD does boot, close it then go to your CD-DVD player. Right-click it and choose Open.

Then right-click W9Setup.exe and Run as administrator and Compustam 2020 starts

if you order a wwn upgrade from the 2020 season, it will be delivered on a USB stick unless it is delivered (order) is digital)

Important: Do not choose the folder where you Compustam for Windows version 3 t/m version 8 for Windows installed Compustam Your data will be overwritten!!!
You can choose the default folder by Best to make any changes

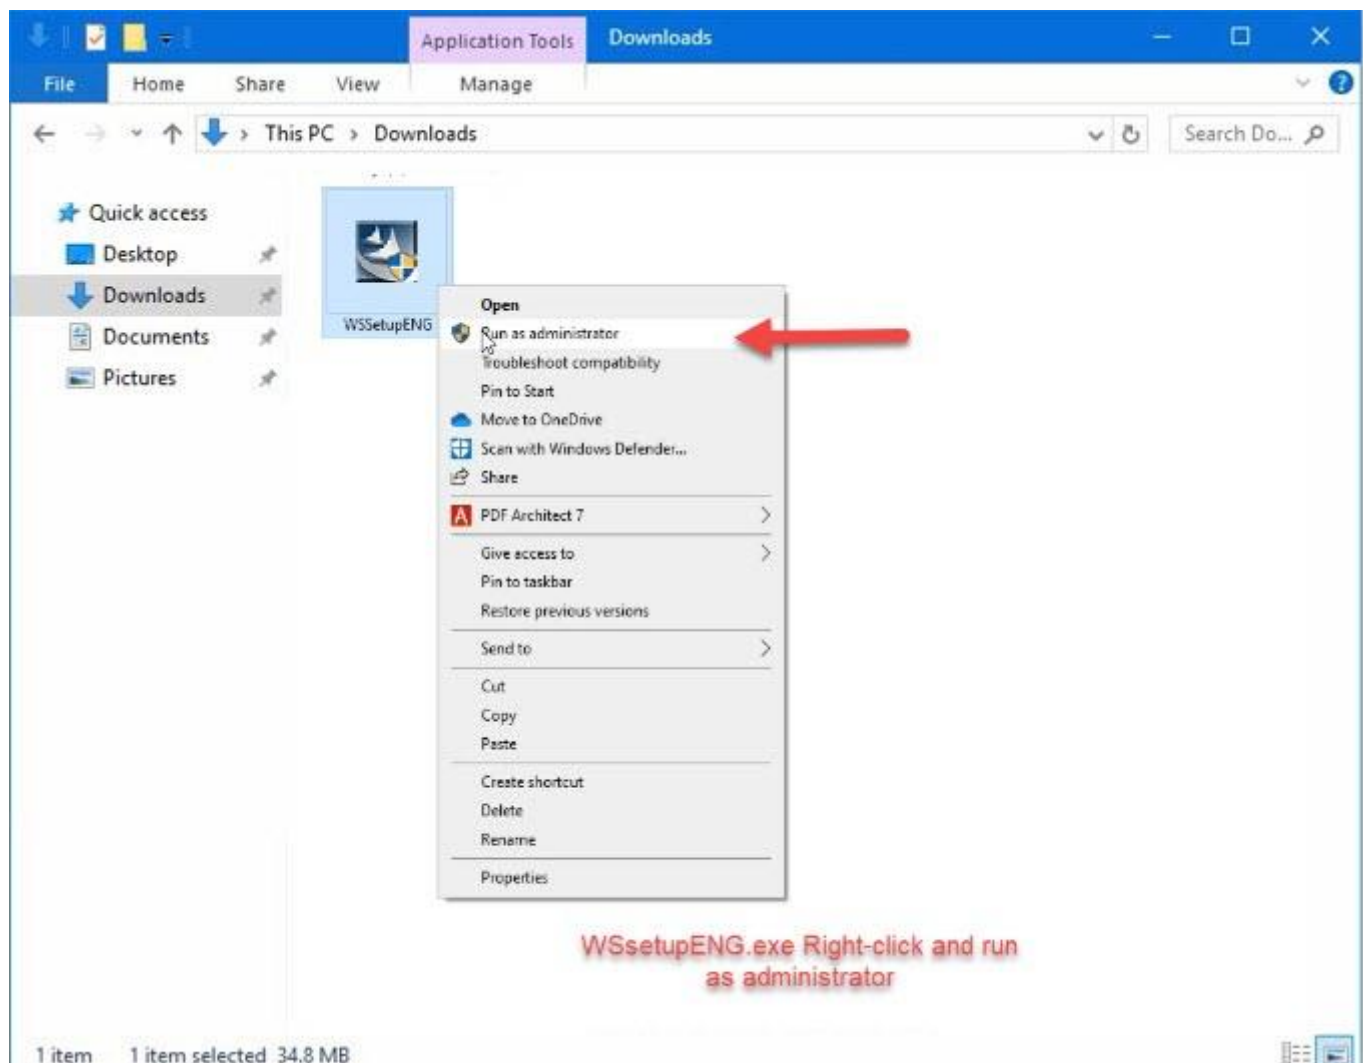

Important: Make sure your login to Windows 8.1 T/M Windows 10 with administrator rights than you have permission to remove or install Windows programs

Installation Compustam 2020 Download version

Note: before importing the old version, it is wise to check the files in this version first indexing via menu item File indexing files

If you receive error messages during Compustam 2020 (re) installation, you can try the following if you have Windows 10 on your PC or laptop.

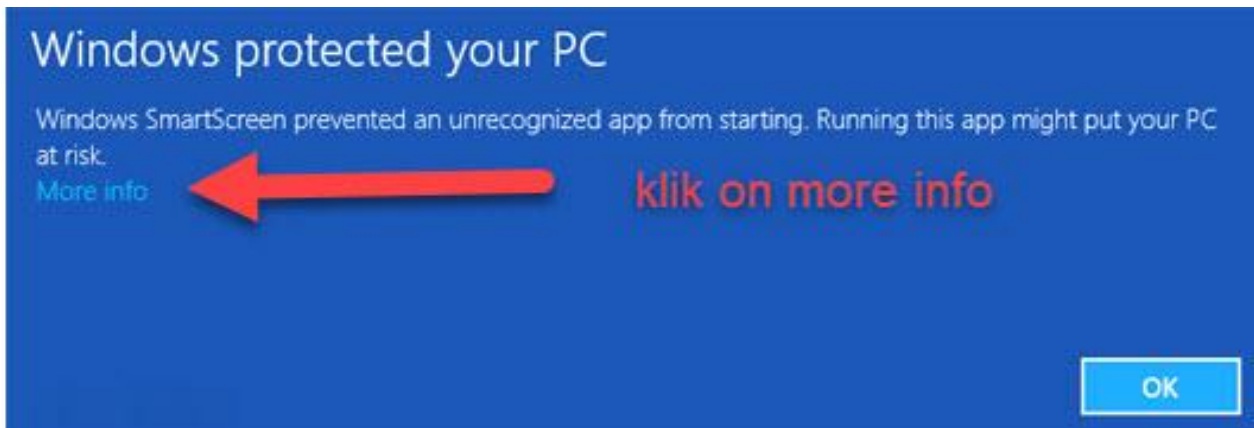

If you received the installation version as download and it is in the Downloads folder (default folder where the downloads are saved in Windows versions 7 to 10 Go to the folder where the download is located

Then right-click WSsetupENG.exe and Run as administrator and Compustam 2020 starts

Installation Compustam 2020 Download version

You may not be notified of SmartScreen see below to resolve it

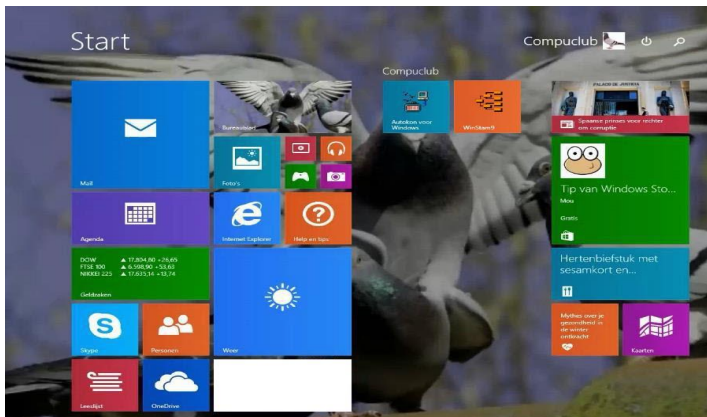

Klik on more info

Now you see App WSsetupENG.exe and publisher unknown publisher
 WSsetupENG.exe is not an app and just comes from Compuclub but Compuclub is not a well-known publisher from Microsoft. Just click Run, and then the installation will just start.

Installation Compustam 2020 with Windows 8.1

1. Touch/ Click on the desktop tile

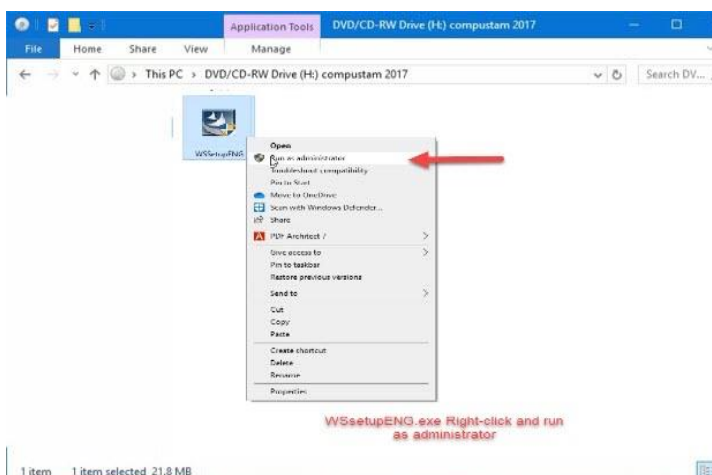

error messages with
Compustam 7 and Windows 8.1
click here

2. Click on Windows explorer

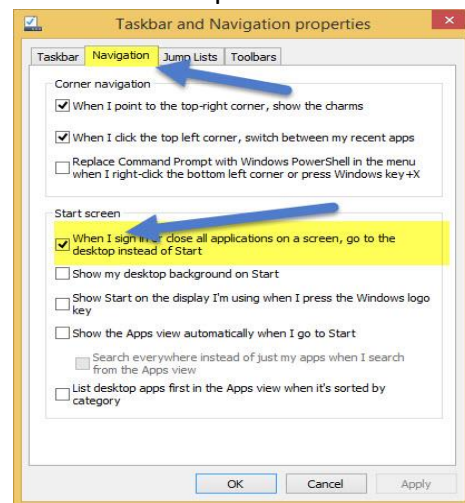

3. Click on the CD/DVD player

Skip Windows 8.1 Metro interface

In Windows 8.1 you can directly go to the desktop like in Windows Vista and Windows 7

Right-click anywhere on the taskbar and choose Properties

Click the tab navigation and click under the heading Home screen. Now the Merto interface on Windows 8.1 will be beaten **Do not forget to click Apply**

4 on the right the content appears, click on setup.exe with the right mouse button and choose for **Run as administrator**, then the main menu appears for the compustam 2020 cd-USB-stick. you can choose for 1 installation compustam 2020

Installation Compustam 2020 with Windows 10 Mei 2020 update version 2004 19041.XXX

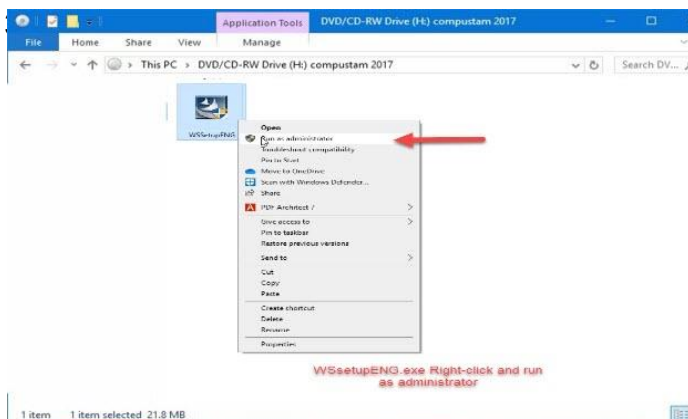

1. Click the Windows Explorer

2. Click the Downloads if you have downloaded the installation of Compustam 2020 has received from our online store or by mail

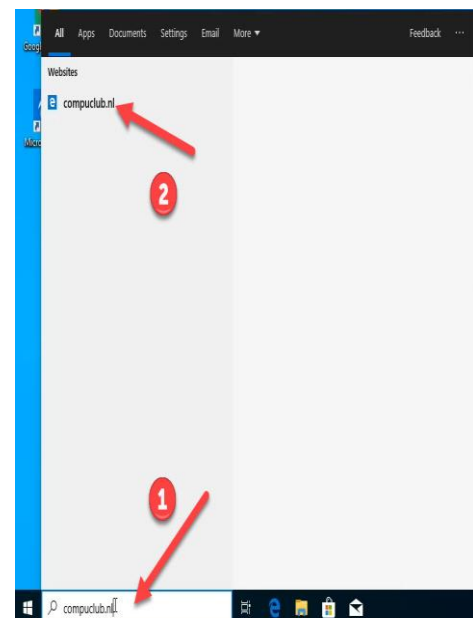

ONLY IF YOU HAVE AN INSTALLATION - CD/USB-stick

4 on the right the content appears, click on setup.exe with the right mouse button and choose for **Run as administrator**, then the main menu appears for the compustam 2020 cd-USB-stick. you can choose for 1 installation Compustam 2020

Searching in Windows 10 has been changed Now you can not only search for files or folders, but also directly to the Internet (for now Bing is not to change) If you do not see the Web option click sprocket no. 2 and switching search online

Installation Compustam 2020 with Windows 10 Oktober 2020 update version 2009 190042.XXX

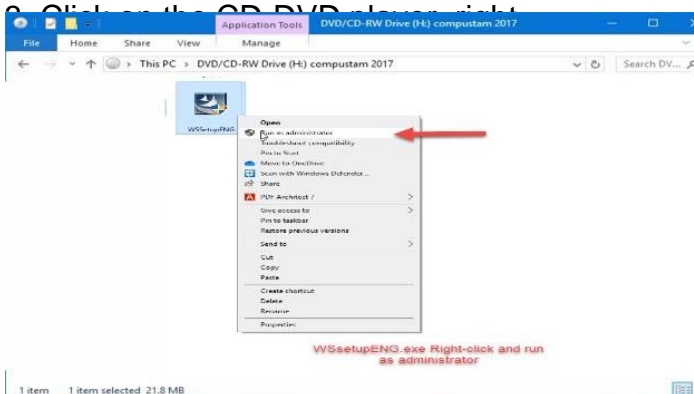

1. Click the Windows Explorer

2. Click the Downloads if you have downloaded the installation of Compustam 2020 has received from our online store or by mail

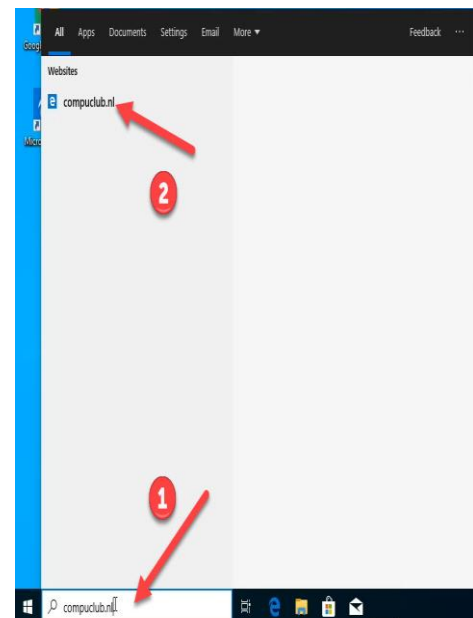

**ONLY IF YOU HAVE AN INSTALLATION
-CD/ USB-stick**

4 on the right the content appears, click on setup.exe with the right mouse button and choose for **Run as administrator**, then the main menu appears for the compustam 2020 cd-USB-aieck. you can choose for 1 installation Compustam 2020

Searching in Windows 10 has been changed Now you can not only search for files or folders, but also directly to the Internet (for now Bing is not to change) If you do not see the Web option click sprocket no. 2 and switching search online

Installation Compustam on a pc or laptop without CD-DVD player with USB-Stick

1. Place the Compustam installation CD into the CD-DVD player (PC or laptop with CD-DVD player) and place the USB Stick
2. Open Windows Explorer and click the USB Stick with the right to

from now on if you order an upgrade or new version, it will be delivered on USB unless the delivery is digital

Choose format

3. Click Start, and then click OK

You must install the latest version of Compustam on the same PC laptop where your current (older) Compustam version is

If you have purchased a new PC laptop with Windows 10 to replace, for example, your old Windows 7 PC laptop, you must first install the latest Compustam version on your old PC laptop, otherwise the import will **not work**

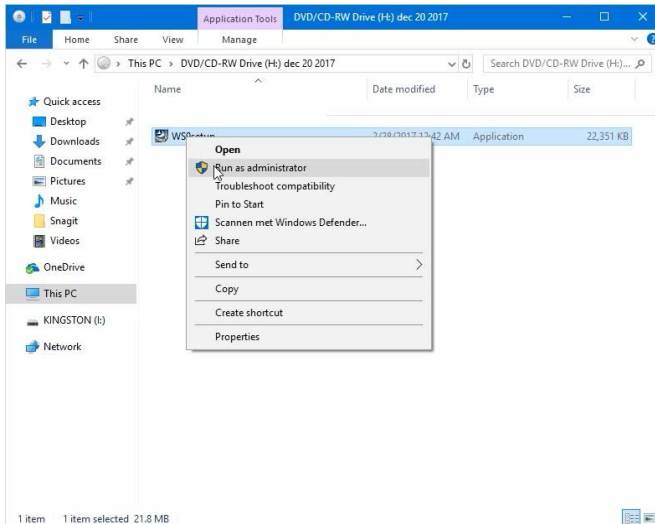

Right- click on the installation CD and choose Open

Installation Compustam on a pc or laptop without CD-DVD player with USB-Stick

Compustam installation-cd

Compustam installation USB-stick

5 click organize then select all

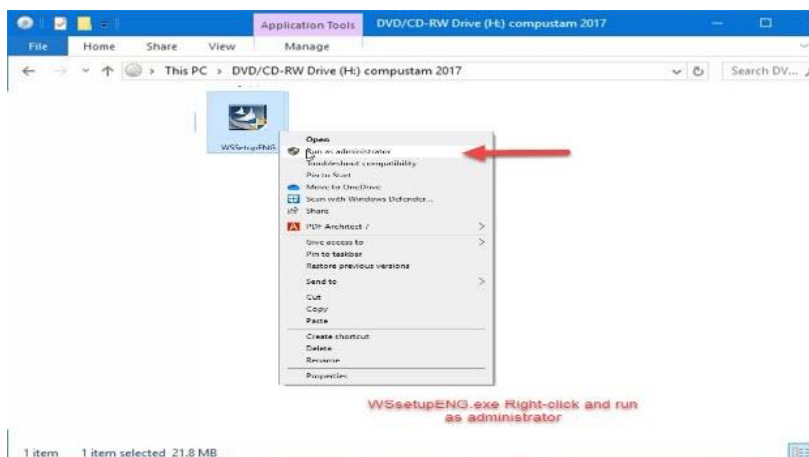

6. click then organize copy

7 go to the USB Stick to (works the same as the Compustam installation CD-USB-Stick)

8 right-click and choose Paste

9 Right-click on setup.exe, and then click **Run as administrator**

10 Now the installation menu appears and can Compustam be installed

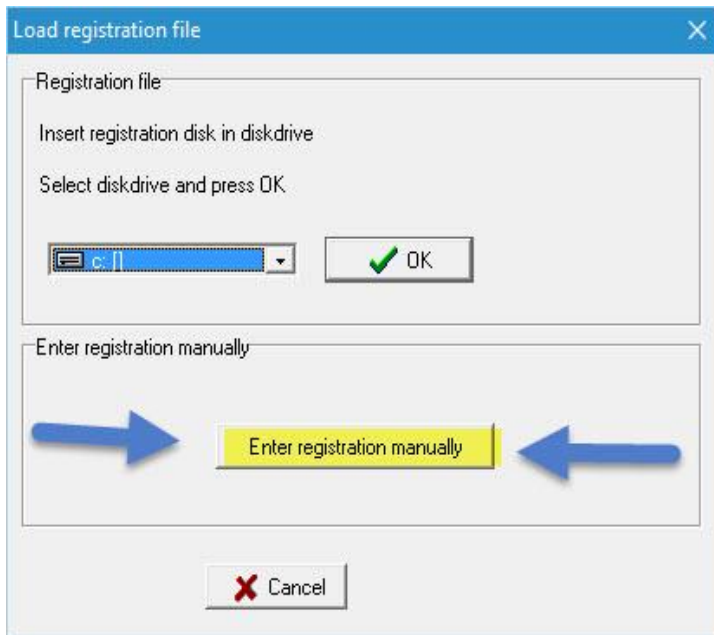

from now on if you order an upgrade or new version, it will be delivered on USB unless the delivery is digital

Important: Make sure your login to Windows 8.1 T/M Windows 10 with administrator rights than you have permission to remove or install Windows programs

Load registration file

Loads the registration file from a registration disk. or enter the registration numbers manually the registration code is on the registration form you received

Registration ID	Your ID
name	Exactly the name on the registration form (note upper and lower case letters and spaces)
Registration key	You enter exactly the key that is mentioned on the form (also fill in the zeroes)
New	
Clientnummer	Do not forget your Customer number Customer number has been added since Compustam 2017

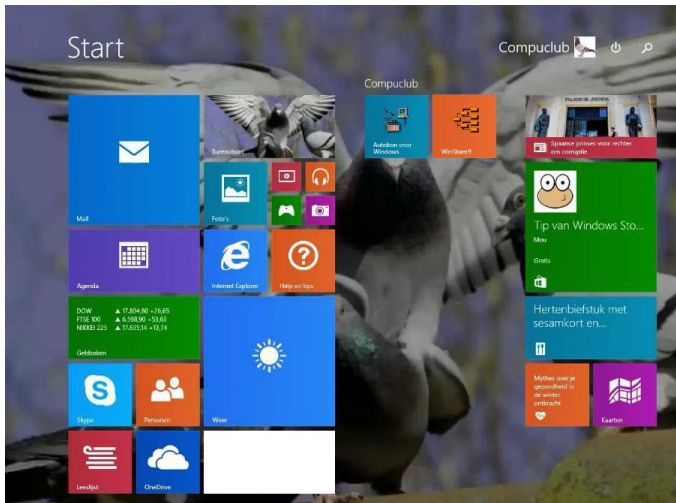

Note: You cannot register another Compustam version. Compustam is then blocked

if you order a wwn upgrade from the 2020 season, it will be delivered on a USB stick unless it is delivered (order) is digital)

Date settings Windows 8.1

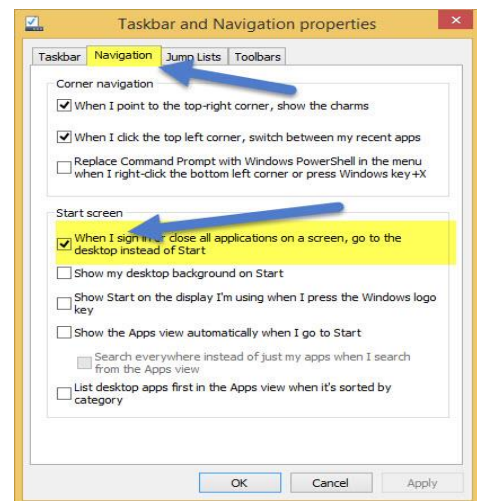

And then well to take the years 1990 2000 + years should you be in the configuration of Windows 8 change the following setting once

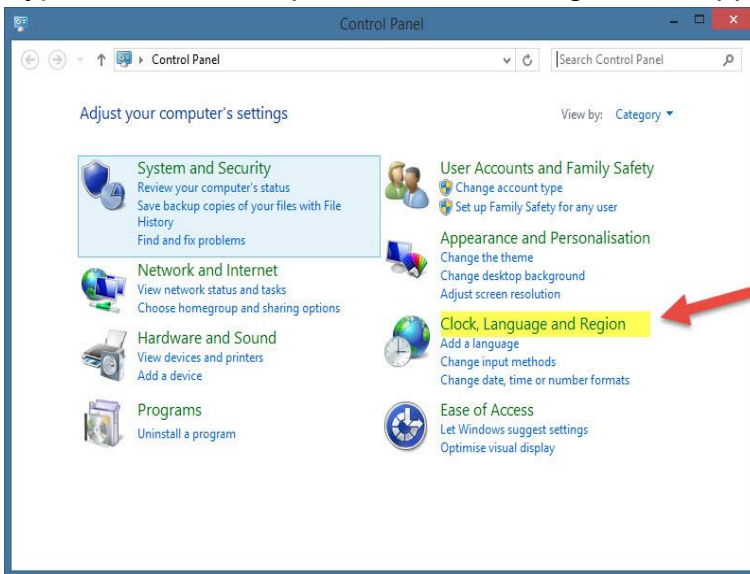

Skip Windows 8.1 Metro interface

In Windows 8.1 you can directly go to the desktop like in Windows Vista and Windows 7

Right-click any ware on the taskbar and choose Properties

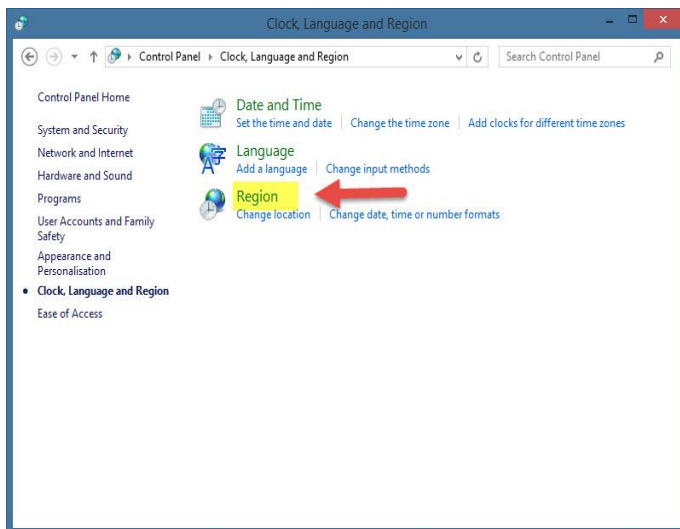

Type **“Control”** and press enter following screen appears

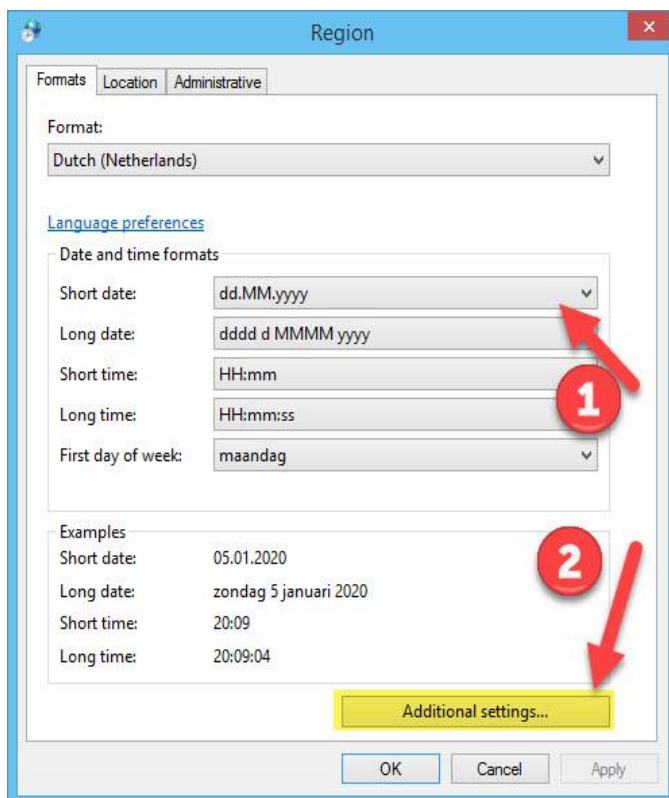

Click the tab navigation and click under the heading Home screen. Now the Metro interface on Windows 8.1 will be beaten **Do not forget to click Apply**

click on clock language and Region following screen appears

Date settings Windows 8.1

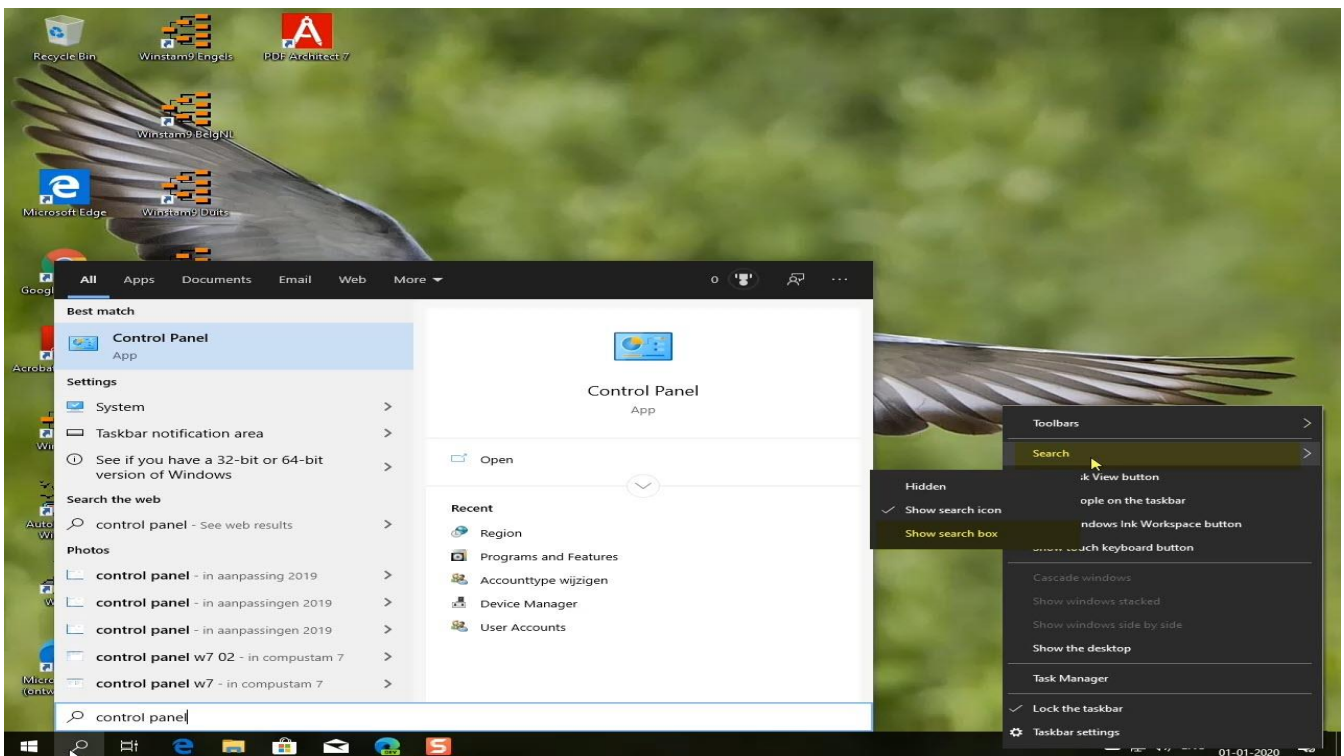

Click on Region following screen appears

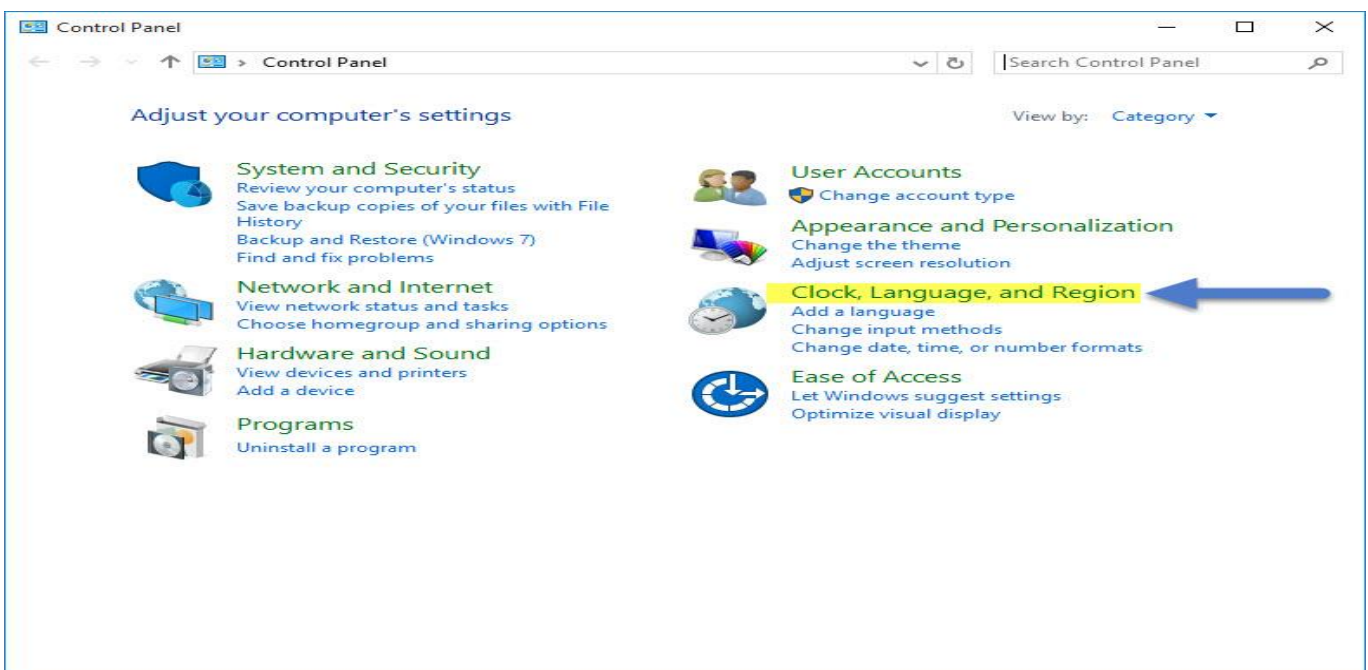

Note the short
time
designation is
set correctly dd-
MM-yyyy

Important: Make sure your login to Windows 8.1 T/M Windows 10 with administrator rights than you have permission to remove or install Windows programs

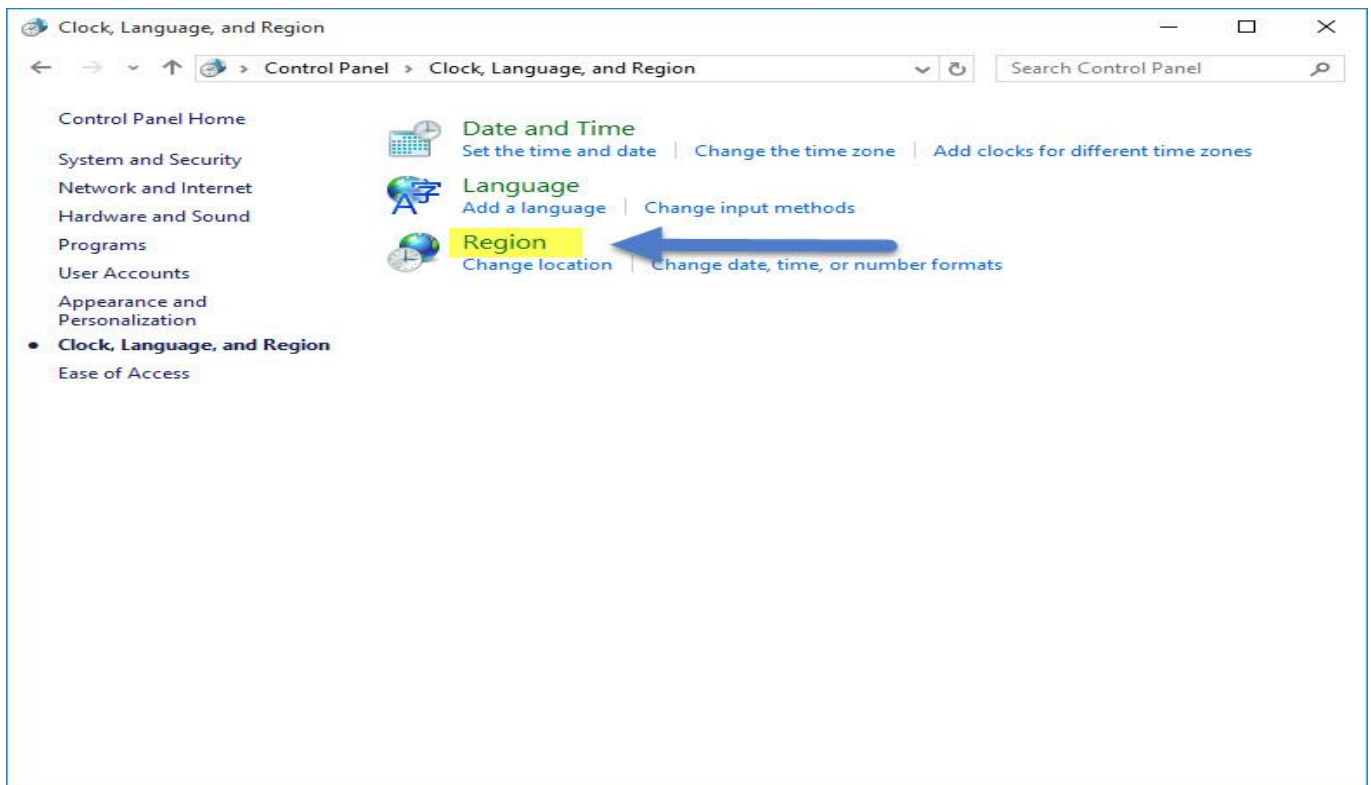

Date settings Windows 10

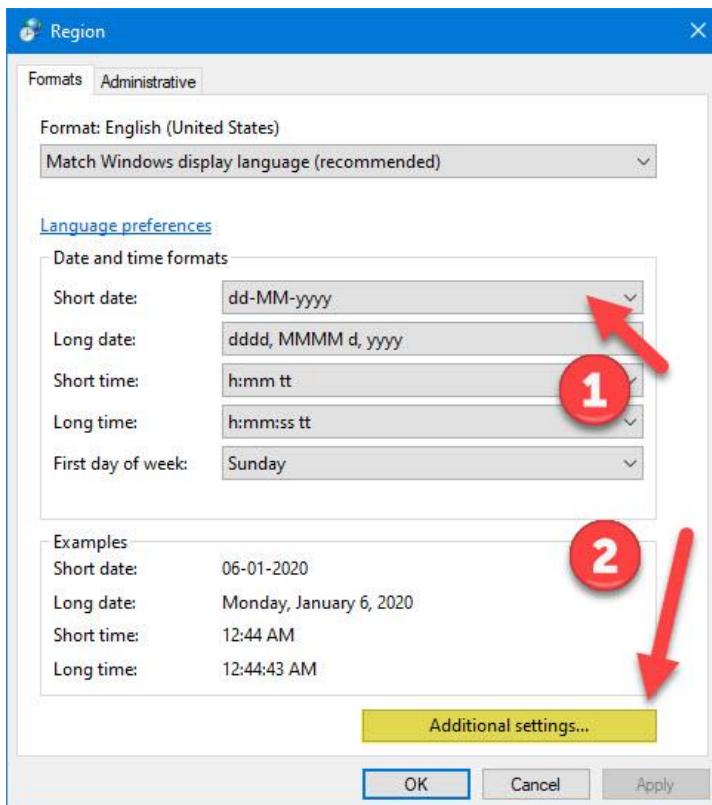

Click the Search button (see arrow with number 1) type in "Control Panel" on the top configuration I Tip: Do you want to search from the toolbar, right-click anywhere on the taskbar go to look for and then display box
Click on Clock Language End Region

Date settings Windows 10

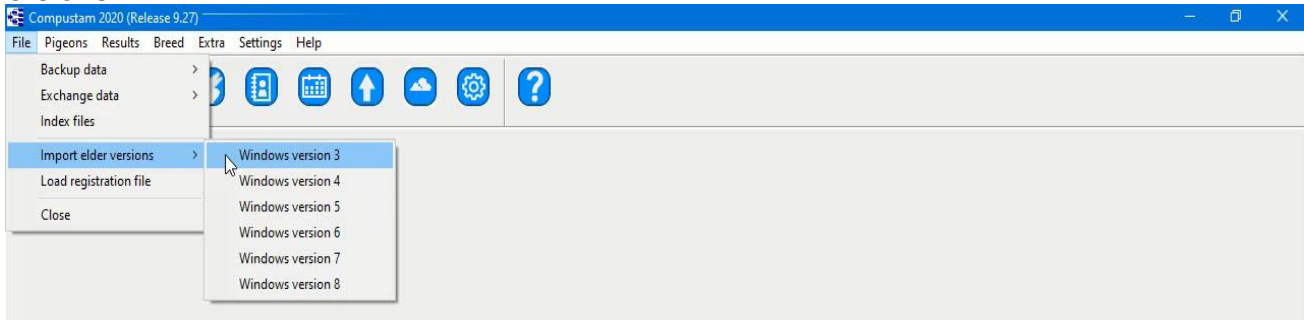

Click on Region

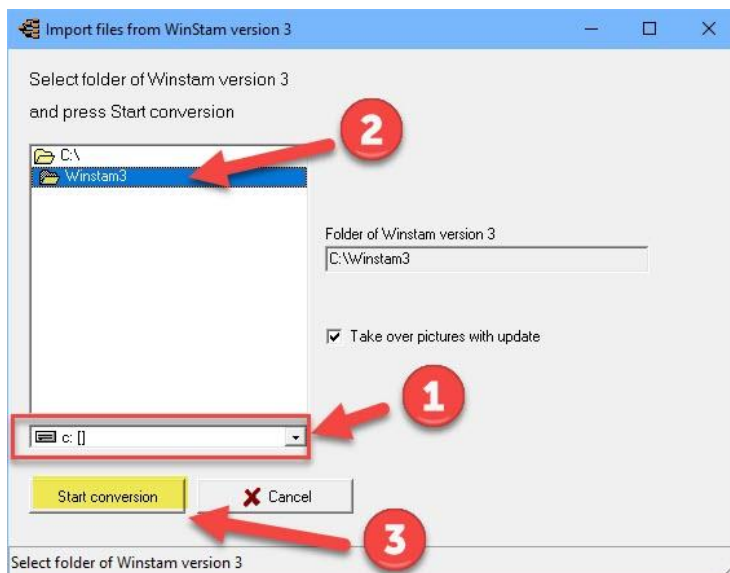

Note the short time designation is set correctly dd-MM-yyyy

Update Windows version 3

Users of Compustam version 3 can copy the data from the elder version by Import elder versions.

Copy the data from Compustam version 3 by selecting your version 3 map (standard name is Winstam3) and press "Start conversion"

Backup

on each PC contains files that should not be lost. Therefore, create a security Compustam 2020 files regularly

FAQ

You must install the latest version of Compustam on the same PC laptop where your current (older) Compustam version is

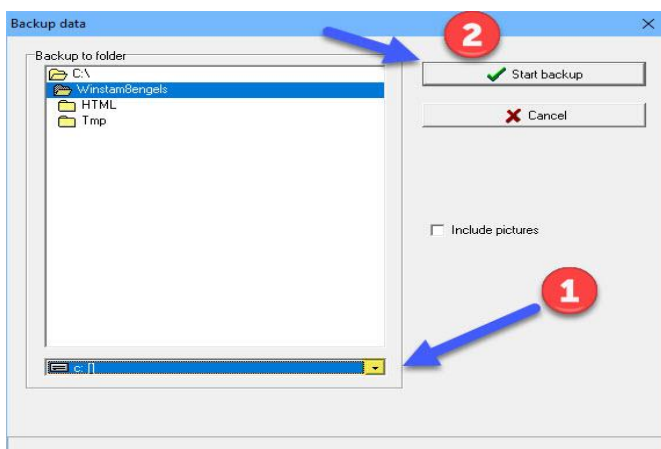

If you have purchased a new PC laptop with Windows 10 to replace, for example, your old Windows 7 PC laptop, you must first install the latest Compustam version on your old PC laptop, otherwise the import will **not work**

new in Compustam 2020 Security to my Compustam Cloud and restore from Cloud
This part works with a new part my Compustam-Cloud in Compustam-Cloud

Pigeondata

In this window you can add, remove or edit pigeons, add notes, show and print pedigrees etc

New in Compustam 2018

Pigeon screen

- Pedigree 3 generations and 4 extra generations are the fields of the first 2 generations enlarged with 6 additional rules
- When introducing new pigeons, country code is automatically filled with the standard country code
- In Screen Pigeons selection possibility in loft

New in version 8
Compustam

Pigeondata

In this window you can enter all the data, edit pertaining to feed the dove in, you can quickly call a pedigree performance offspring retrieve search request notes (notes if any) via buttons with yellow arrows.

Using the buttons at the top of the screen you can perform the operations	
add	Add a new pigeon to pigeon's data
delete	Delete a pigeon from pigeon data
Edit	Edit pigeon data
Find	Find Pigeon data
Copy	Copy Pigeon data
Notion Leaf	Leaf notion
Pedigree	Pedigree from pigeon

Pigeondata

The screenshot shows the 'Pigeons' application window. At the top, there are search filters: 'Go to' (with a text input), 'Pigeoncode' (a dropdown menu set to 'All pigeoncodes'), 'Sex' (a dropdown menu set to 'All'), and 'Loft' (a text input). Below these are buttons for 'Add', 'Delete', 'Edit', 'Find', and 'Copy'. A yellow button labeled 'Find results brothers sisters' is also present. A table with columns 'Country', 'Ring #', 'S', 'Pigeonname', 'Pigeoncode', 'Sire', 'Dam', 'Colour', 'Breeder', 'Breed', 'Pair #', and 'Loft' is visible. Three blue arrows point to the search filters with labels: 'instant search' (pointing to 'Go to'), 'Search on pigeoncode' (pointing to 'Pigeoncode'), and 'Search on SEX' (pointing to 'Sex'). A red text 'New in Compustam 2017' is in the top right. The bottom section contains a 'Pigeon' form with fields for 'Pigeonname', 'Breed', 'Colour', 'Breeder', 'Sire', and 'Dam'. There is also a 'Pigeoncodes' list, a 'Show pictures' checkbox, and buttons for 'Pedigree', 'Results', 'Diagram', 'Offspring', and 'Notes'. An 'Extra window' section has radio buttons for 'Dif', 'Pedigree', and 'Results', with a 'Level1' dropdown. The status bar at the bottom shows '# of pigeons: 0'.

If you are about to add / edit the dove is divide into three tabs

The screenshot shows the 'Add new pigeon' dialog box. It has a title bar 'Add new pigeon' and three tabs: 'Basic data', 'Purchase/sale', and 'Diary'. The 'Basic data' tab is currently selected.

Tab Basic data
Tab Purchase/sale
Tab Diary

The screenshot shows a pedigree chart window titled '11-4707648'. It displays a family tree of pigeons. The chart is organized into four sections, each starting with '1/2-Brother/Sister:' followed by a pigeon code and a list of its parents and siblings.

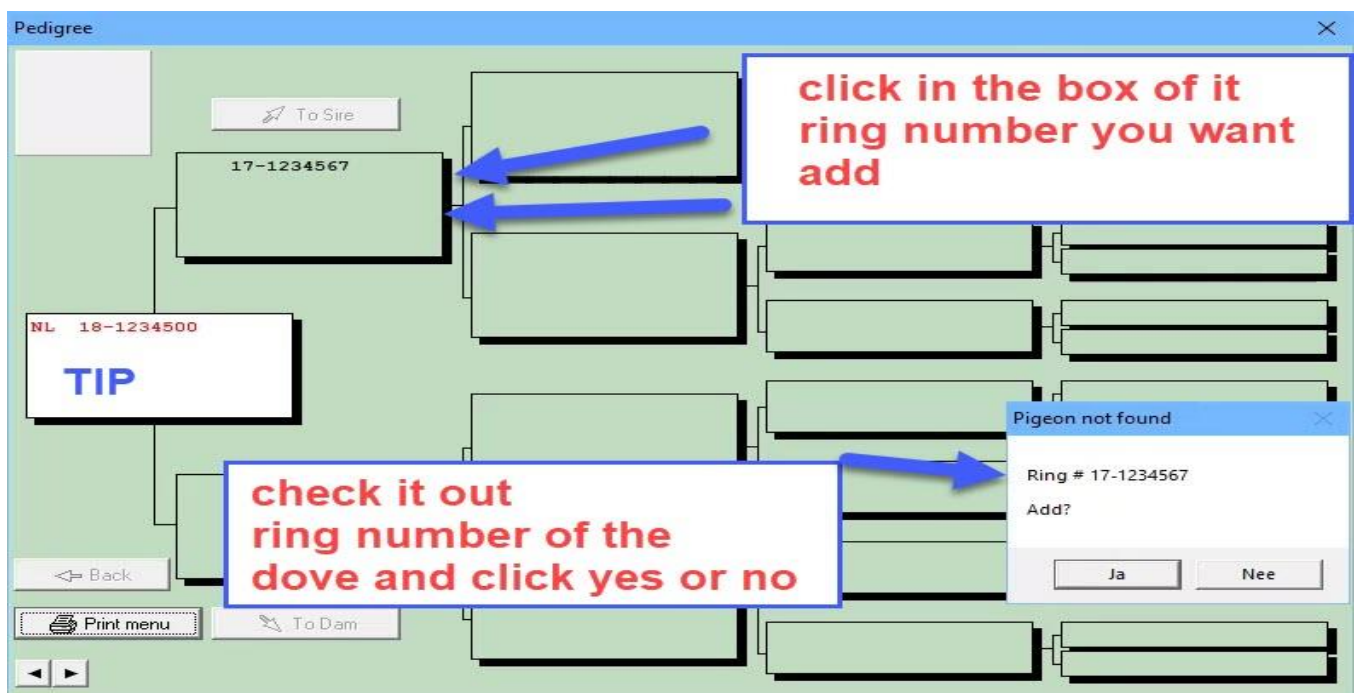

Pigeon	Parents	Siblings
08-4763704	Zutphen 31/ 298 Pommeroeu 59/ 183	
09-4772334	Hasselt 35/ 1611 Zutphen 402/16159 Boktel 16/ 231 Zutphen 25/ 347 Boktel 67/ 370	
09-4772335	Zutphen 20/16159 Strombeek 42/ 185 Gennep 70/ 239 Zutphen 82/ 244	
10-4789190	Ravenstei 83/ 1329 Strombeek 97/ 950 Zutphen 2853/13653 Rekkem 35/ 112 Gennep 69/ 208	

Pigeondata Add & edit

You can set colors per pigeon for example, a certain bloodline or race etc. If you press the button, you can add or edit, click the Add tab basic data or change. For color settings box, you click back color ring number or color box, you will see which can be selected. Schedule with the red minus button to remove the color. You can easily add a dove through pedigree. If you

have entered a dove with parents you see on the tree green box with the ring number, click on the green box to the father / mother to add to your family tree file.

TIP: By clicking on the white box you can enter the youngster's parents can best work this way. Look Through the binoculars the pigeons. If you type the pigeons immediately goes wrong and there is no good pedigree shown. If you look up the birds with binoculars the clutch properly made and the country codes easily viewed directly to use for your ES-System

New in Compustam 2018 default country code

Remember if you make a family tree can also be used. Proper country codes If the country codes entered once good and you make one or more pigeons loft list, they're even good

It is best to first add the ring series of the youngsters and then the parents present search with binoculars

Pigeondata Add & edit

afterwards you will see the following screen

Some important clues

- The year must always be filled with 4 digits
- Change input field by means The Tab key (one square) or **SHIFT + TAB** (backwards one field) the mouse is also possible.

- Compustam is set so that there are two sizes of ring numbers can enter.

- To enter the Dutch format, Turn on the first field

Example. with ring number 20-1234567 fill in: 1st 2nd box empty box 2020 and the 3rd box 1234567 Eg. German ring number 15412-18-34567: 1st 2nd box 15412 box 2020 and the 3rd Box 34567

To change a pigeon (bottom left of the window), the parents can use the search button with the binoculars. Then you can easily adjust the father or mother search your pigeons. The parent is not there, you can also enter the ring number. **Note: the last method will only ring number in the family tree**

Pigeondata Add & edit

Important note: If you are after adding a pigeon discovered that the ring number are inserted incorrectly, you cannot change the ring number. The whole number of the ring dove **You must delete and re-ring the correct number to add**

New from Compustam 2018: set default country code

TIP: It is best to work this way. Through the binoculars to look up the pigeons. If you type the pigeons immediately goes wrong and no good pedigree shown. If you are using the binoculars the pigeons look up the link is made and the country codes easily viewed directly to use for your ES – System

New in Compustam 2017 default country code

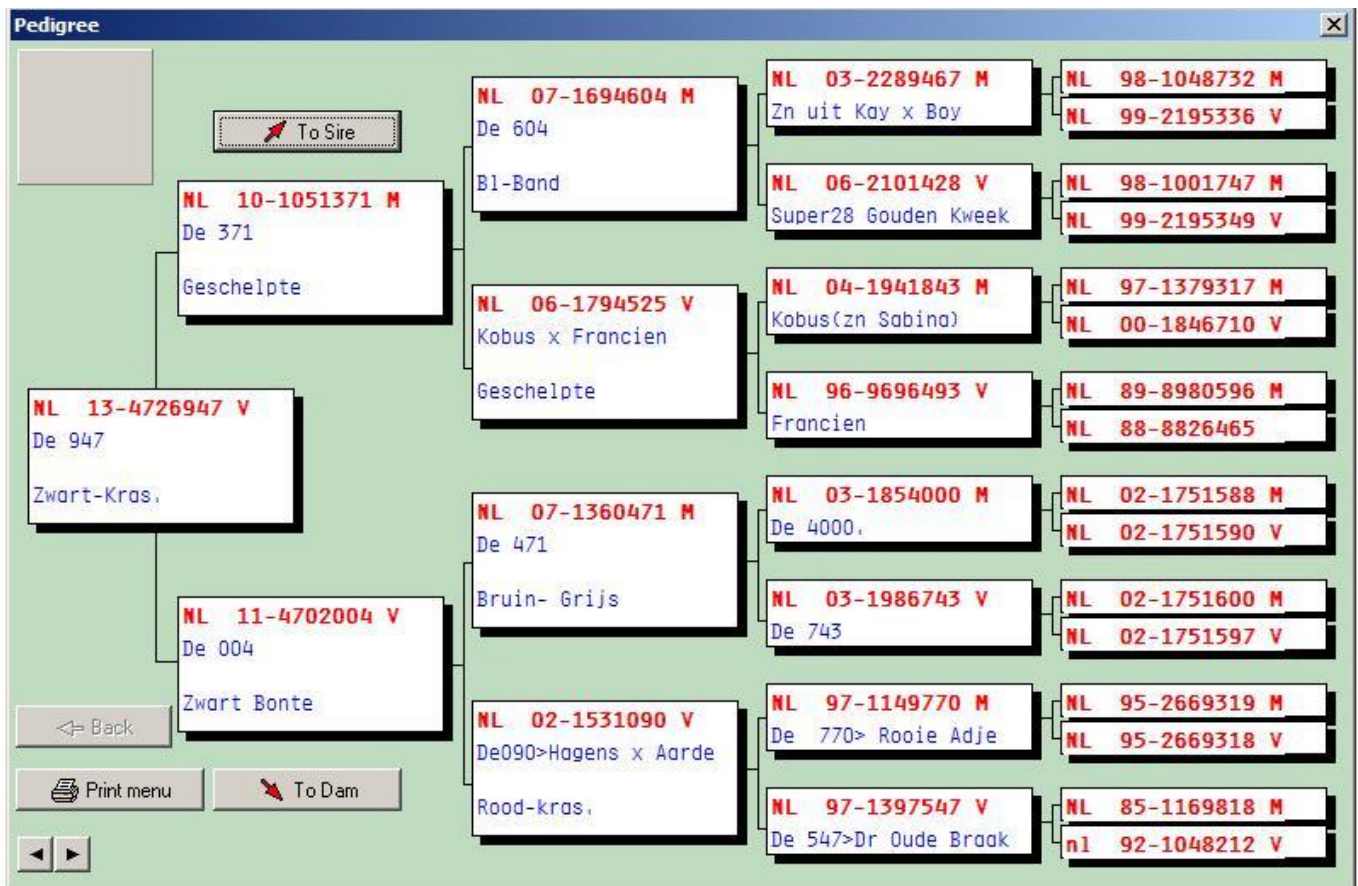

Remember if you make a family tree can also be used. Proper country codes If the country codes entered once good and you make one or more pigeons loft list, they're even good.

See the following sections for more information
Change Country Codes and [Country Codes](#)

Pigeondata Pedigree

If you click the button you will receive a pedigree pedigree Scrolls 5 generation. You can do the following things with this screen.

Printmenu	Go to printmenu
To sie	If you click on this option you go to the sie site
Naar moeder	If you click on this option you go to the Dam site
Back	If you click on back you return to thee youngstar
On Ringnumber	You have access to Pigeon data from the pigeon

Pigeondata Printmenu

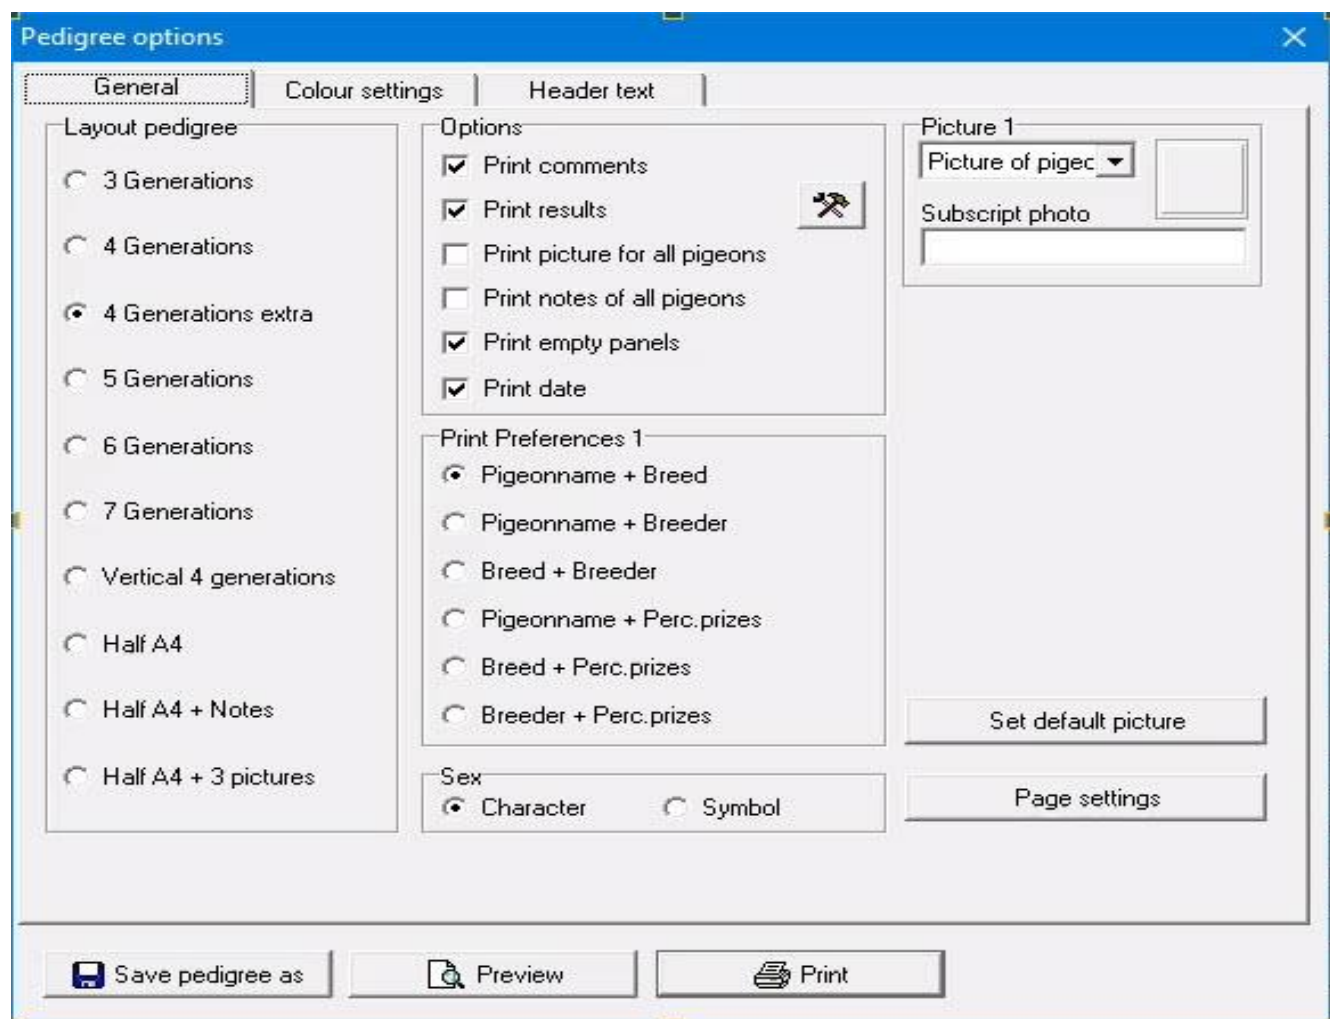

General tab:

In this menu you can give family on the basis of some institutions a nice layout. The settings are

- Number of generations size photos printing format (Half A4)
- Options observations and / or performance printing on the tree (click on white box)
- You can also specify whether the notes of all the birds on the tree are to be printed
- Photos click on the arrow next to text window "picture of pigeon" to select something else. You can also set a default photo award
- Page Setup: You can apply up to a range of 10 cm above and left.

* Note, however, that the entire family shifts that may no longer fit on paper)

You can enter up to 90% - 110% of the subjects of the pedigree in width and height adjustment

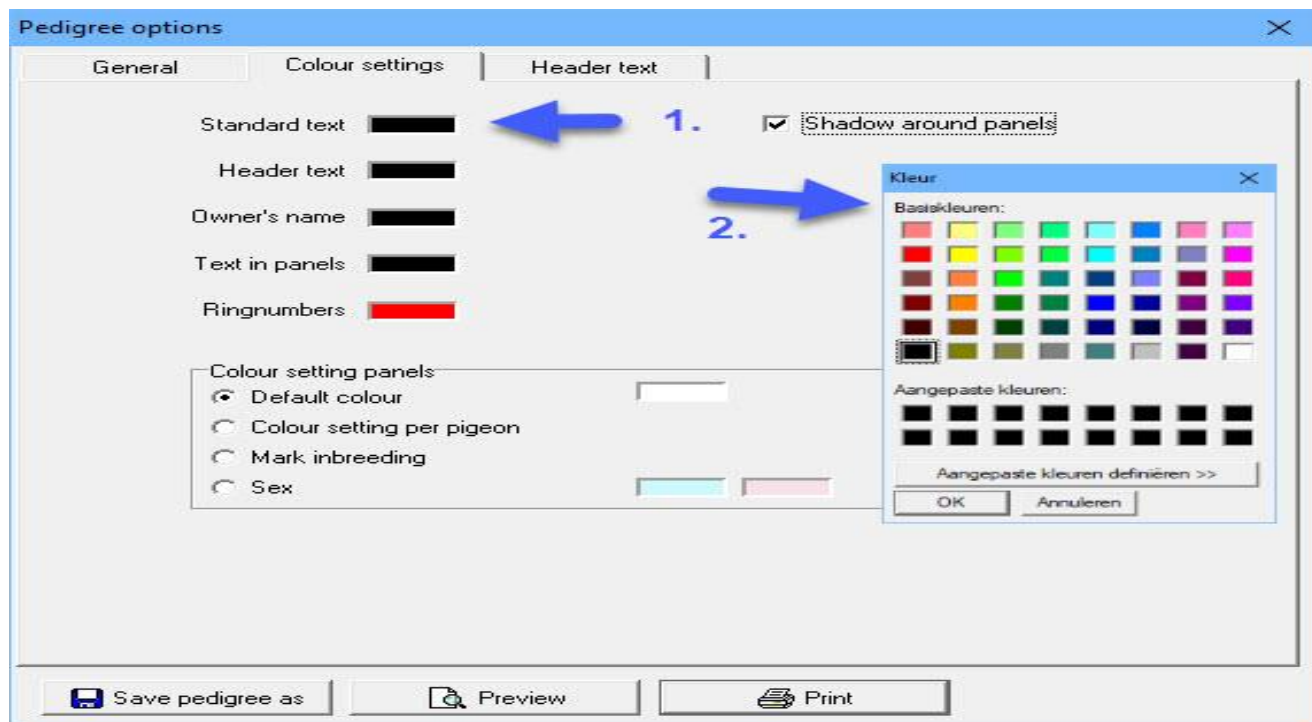

Pigeondata Printmenu

TAB: Color Settings

If you click on the tab color settings you can select the colors that you want on the family tree assigning You can specify which color box you want to use, you can also specify whether to shade the boxes want.

click for example the color next ring number to change the color. You can also choose other colors' button to make a color to your taste add. You can also be using the mouse in the field colors on the color button. Use the slider to the right of the color field to the color harder or softer. Click on the Add color to the selected color to add to your color collection

New in Compustam 2018

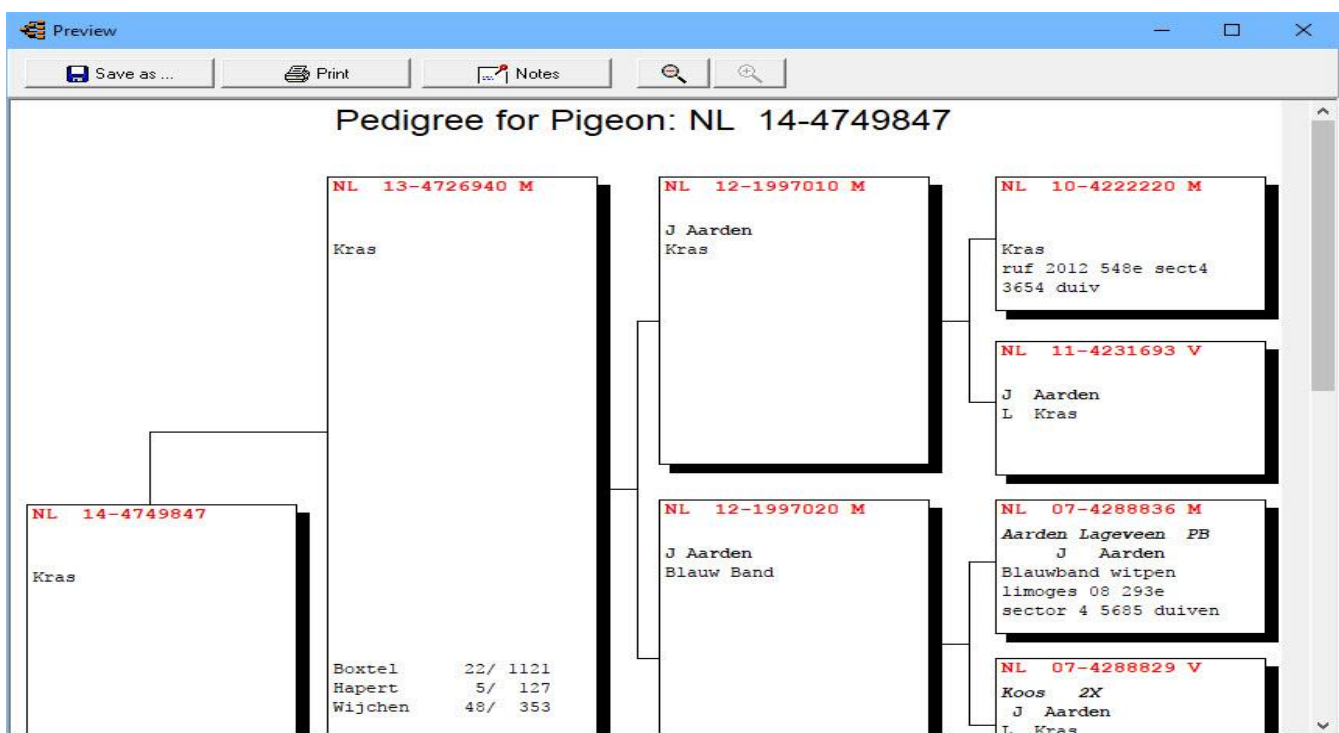

Print options

- Stam cards with pigeon photo in each pigeon box
- For font card, the font style is adjustable for ring number, pigeon name, breed, and breeder
- Two free fields on the card for eg e-mail address and website
- View gender code in the enrollment list
- In breed cards pigeon name, breed and breeder can be printed in a different color

Pigeondata Printmenu

The final result you can get on the first screen to determine whether the family is suitable in order to print. Through the sliders to move the bottom and right to scroll through the tree back slide. Also, you can put the mouse on the tree with the left and right, hold and move the mouse o, move over your screen. Trunk card

If you click on the button notes can all notes proforma seeing the pigeons a notepad to the selected pedigree. If you have checked this option, they will be printed after the printing of the master card.

New in Compustam 2018

Tab "Header"

You can decide what header is used for such a language other than Dutch

Pigeon Data Search ring with binoculars

TIP: It is best to work this way

Through the binoculars the pigeons look. If you type the pigeons go directly wrong and no good pedigree shown. If you look through the binoculars pigeons, the link is made and the country codes directly properly to Your use ES-System

New in Compustam 2017 default country code

Think of it as a family also makes good to use country codes. If the country codes are entered properly and you make a or more pigeons left list then they are equal properly.

See the following sections for more information
Country codes and **Dove Codes**

Through the binocular you can look it up in your pigeon pigeons. You do this by the last three digits typing. of the ring number

TIP: If you enter the last 3 digits but the bird is still not to set the search function on:

- From 1900
- All sex
- Selection code dove off (unchecked)
- Start selection

Then select the correct dove right as Compustam several pigeons find and click OK

Pigeondata Search in tekst

You can now search all fields at once a pigeon on a specific text.

Annual Survey

With annual reviews, you can select flights and thus have an overview on price points or possibly a couple. If you have annual reviews startup you will see in the left column are the flights you entered. At the top, you can change the year, you choose one or more flights by double-clicking with the mouse or by using * or letter then click on or off.

In the right column, you can select the level you want to see an overview. If you want to have a selective overview, you can also select dove code. If you have entered the data, you can click the Select button. Compustam now calculates based on your settings, if you click on the items price or list appears with some prizes or points. You can also filter by gender. You can also see the parents of the performance pigeons, then you can quickly pick out the good couples.

You can set the font size, the larger the font, the fewer flights to print. With the Print button to print the list to a printer in which you may have to file to store the data.

There are graphs each pigeon that can be set with color and options from the diary linked. There is now the ability to find via a search option in the annual a pigeon.

New in Compustam 2018

Pair and breeding

- List cultivation per round can be sorted by date Ei-1
- If importing young pigeon in breeding data already exists, there will be an error message indicated at which torque number, bin number and round number it belongs
- Function in the 'File' menu and the screen-breeding-screen to update the bucket and loft in pigeon data
- In case of insertion, the loft and bin number is updated in pigeon file
- When looking for couples on shortened ring number of father and mother

Calculate pairing date

With this option it is possible to calculate the pairing-date

Suppose you want to do winter breeding

You get 1 January; the rings of the ring Administrator shall want you directly to the youngsters can slide the young newly rings around 7 days. You can leave young 7 days of the date in this case 01-01-2020 instantly calculates the program from various dates.

You can see the best couple date is November 25, 2019 at a driving time of 10 days to do the pigeons takes longer than 10 days between the link and the 1st egg you can naturally increase or decrease the number of days.

Advantages:

- You no counting from the date on the calendar itself
- If you want to vacation in between you can have a quick way to calculate an ideal couple date
- so your birds breed during your absence.
- You can calculate this way when the boy pacifier ready
- You can nest an ideal position for flights calculate

Browse pair/breed

Browse pair/breed

By clicking the Add button to add a new flock, when you click the Edit button, double click on the couple to work then you can edit / change by pressing the delete button this couple you remove the torque is selected. This is indicated by the blue bar with a black triangle there to see explanation. Insert you double-click a boy determines torque is directly on the screen maintenance culture.

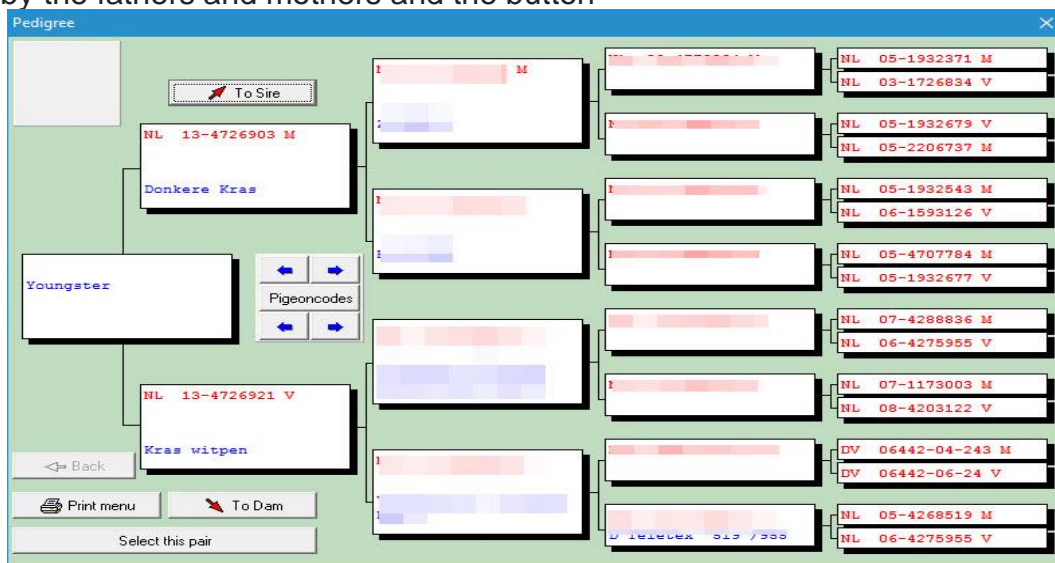

For new couples input fill loft / bake no in

for example You have a couple of loft and 2 is in the 3rd breeding book please fill it out as follows: **02-03**

with serial number is following means at the 1st link of some cock in a loft determines / broedbak get the serial number if one is on the same cock coupled with a new hen will get the number 2, the cock once more linked than about getting the serial number 3 ect. with binoculars you on that cock or hen look, fill in the date and torque you can fill in the breed.

**important loft numbering always
01-01 for a loft one and box one
and not 1-1**

The Pro-forma button, you can also see a pro-forma pedigree also can according to the selected codes dove leaves select this couple is the couple acquired to browse & culture data by the fathers and mothers and the button

Browse pair/breed

Every year you have the torque and breeding data re-enter. Behind breeding year, you through to go  back and go forward  In Go, go directly to the correct loft and bake

eg loft 4 speed 4, then 04-04 (see also with new torque input fill loft / bake no in)

The  middle buttons scroll forward or backward a couple

New from Compustam 2019

Enter the information that you know for example, color and race and dove name and, optionally, whether it is a cock or hen
 it is important that you complete this information as much as possible, especially if you want to Export the dove or pigeon

Add series of ringnumbers

You can once add ring serial numbers of youngsters to give your pigeons in the year of the pigeons and then start the ring number. The first five digits of the starting ring number are automatically copied to the end ring number, the last 3 digits should be to be fed. You can enter up to 200 birds at one-time larger series should be introduced. As several small series

When a series of young birds is introduced in this way, culture can be entered using a youngster quick maintenance the search function.

New!! the option directly enters a pigeoncode when add series of ring numbers to pigeon

TIP: This way you can also use it as another pigeon fancier breeds for you and your ring series used this lover put your ring in his series Compustam version on a separate pigeon code. Then the pigeons are bred for that you have saved. Using the Export option on pigeon code Important If you go over the ring series does not enter into your own Compustam version to work in this way

Offspring

To obtain an offspring list of a pigeon, enter the pigeons ring number and the number of generations you want to be listed. Press select to start the search operation

The screenshot shows the 'Offspring' application window. At the top, there are input fields for 'Ring #' (2011 4707652) and '# of generations' (1). A 'Pigeoncodes' dropdown menu is set to '- All pigeoncodes'. The 'Sex' dropdown is set to 'All'. There are buttons for 'Select', 'Pedigree', 'Print', and 'Results'. A '# found' field displays '3'. An 'Extra window' section has radio buttons for 'Off' (selected) and 'Results', with a dropdown set to 'Ald10'. Below these controls is a table with the following data:

Gen	Ring #	S	Pigeonname	Pigeoncodes	Sire	Dam
1	12-1072306	M			10-4789177	11-4707652
1	12-1072307	M		o	10-4789177	11-4707652
1	13-1650384	-		8	12-1072377	11-4707652

At the bottom left, it says 'Search completed'.

Pro forma pedigree

	<p>Enter the ring numbers of a sire and a dam or select them by using the find buttons. After pressing the pro forma pedigree button the program will show a pedigree of 4 generations. This way you can view the pedigrees of virtual pairs in advance to make the right match</p>
	<p>Use the arrows to scroll forward or backward through the cocks and hens</p>
	<p>If you click on the button codes dove dove codes you can specify that you only want to see to scroll eg only the racers or just the breeding pigeons or a particular variety depending on your pigeon codes.</p>
<p>Using the printing feature to print pro forma pedigree</p> 	
	<p>Scroll through options to mother 'and' father in "you can browse unlimited generations</p>

Pair list

You can use this option to enter a list of flocks of a certain year by one year and then press select to generate the list using the print option you can print the list.

Velocity Calculator

By entering your distance and the flight time the program will give the velocity

The image shows a screenshot of a software window titled "Velocity Calculator". The window has a standard Windows-style title bar with a close button (X) in the top right corner. Inside the window, there are three rows of input fields. The first row is labeled "Miles/Yards" and contains two adjacent text boxes. The second row is labeled "Hours/Minutes/Seconds" and contains three adjacent text boxes. The third row is labeled "Velocity" and contains a single text box, with the text "Yards per minute" positioned to its right. Below these input fields are two buttons: "Calculate" and "Empty fields". The window has a scroll bar on the right side, indicating that the content can be scrolled vertically.

Analyze flight

Enter liberation point (with latitude-code and longitude-code) and enter arrival point (with latitude-code and longitude-code).

The program draws the line, up to 5 arrival points are possible at one time

Diary

With daily diary, you can capture the various activities per day per pigeon. You can also plan into the future contain activities capture so you will be reminded when you start Compustam. The diary looks like

The diary consists of three parts:

- Date and display
- The actions that need to be performed
- The pigeons which the acts entered date is applied

Date and Display:

The bold numbers in the month means that on that day one or more activities, occurred. You can click on any day or go to a different month or year. If today you click the button, the current date set

The display can be adjusted by the following set itself

- **Period**
- **Status**
- **Category**

If you click on the calendar button week or month calendar gives you an overview in a preview screen which you can print.

The act performed or to be performed are

If you click the green plus button to add an action.

If you click the red minus button to remove an action.

If you select the action (making blue) can give you a status for the operation concerned.

Completed or outstanding. Closes an action, and this is not in the main

You can specify a description for action / event.

The floppy disk button at the top of the screen to save data in Compustam

Date	Event	Status
10-07-2020	Pigeons in bad	-

Event: Pigeons in bad

Category:

Status: ☒ Open ☐ Completed

Description:

The pigeons that entered operation and date applied.

With the green plus button to add one pigeon.

With the red minus button to delete one pigeon (which is marked blue)

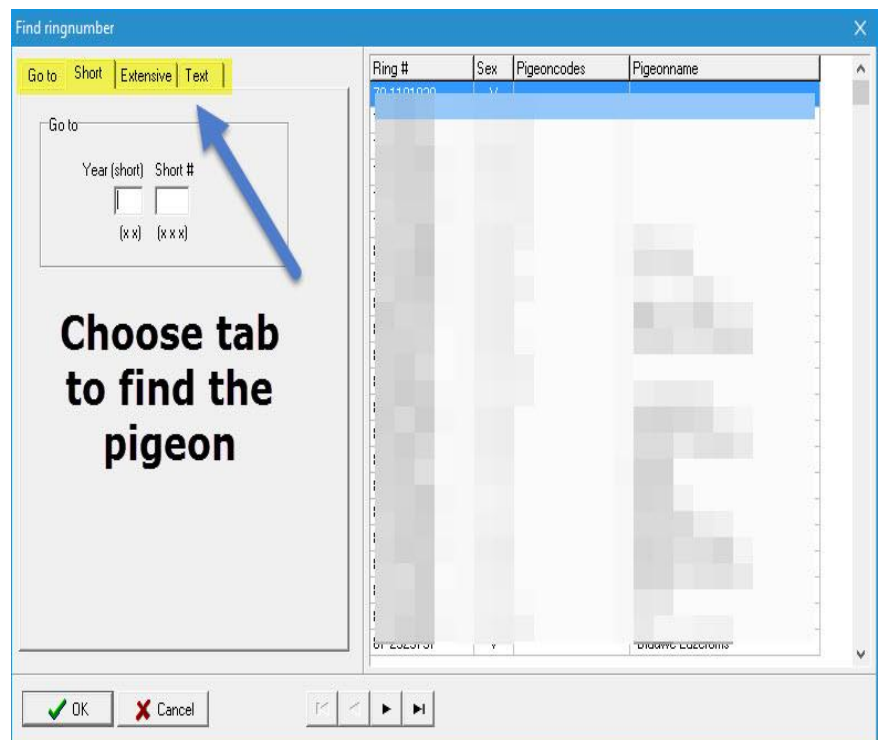

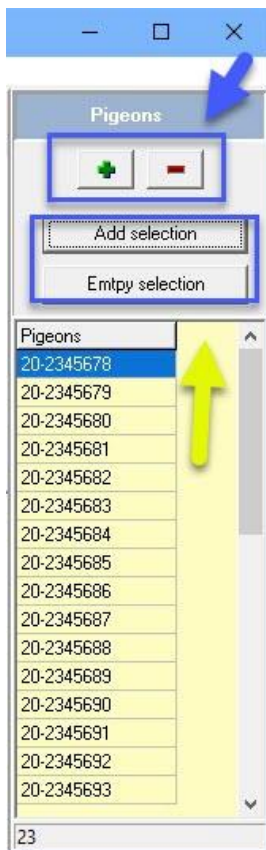

Add to the selection button inserts in one fell swoop a whole selection to code or a pigeon loft the selection button makes emptying the entire selection empty again

This has as an example if you look at the graph on pigeon that you can see in the chart days on which an event has occurred. Imagine yourself 3 points a pigeon in the same week off and you create with dove on a good result then you can immediately see from the chart that the buggy a positive contribution to the performance.

Conversely, of course, too. If substandard is presented may be appropriate that a particular event is eg cancer cure

In the tab 'Diary' is maintenance screen pigeon can you see what the event with the appropriate Dove has happened or should happen

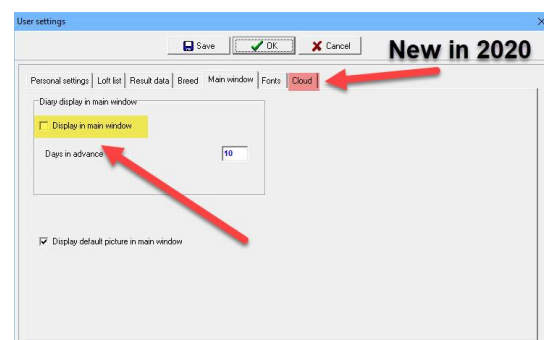

Diary

After introduction event, you can see it immediately on the main screen so you are warned

User settings – Race results

In the column "Description levels" you can give every level its own name. "Minimum proportion" determines what results are to be selected for best results.

When you choose a proportion of 1:10 (Results percentage = 90) only the pigeons classified in the upper 10 per cent of a game will be selected. The program searches through all the levels to find the best proportion for a pigeon at every race.

With "Minimum competitors" you can let the program omit results of games with very few competitors.

Countrycodes

Enter the country codes you want to use for the pigeon data.

The country codes from this list will appear in the list box country in the pigeon data screen

The screenshot shows a window titled "Countrycodes" with a close button (X) in the top right corner. It contains a table with two columns: "Country code" and "Nationality". The table lists the following entries:

Country code	Nationality
B	Belgie
BU	Bulgaria
D	Duitseland
DK	Denemarken
F	Frankrijk
HU	Hongarie
I	Italië
IE	Ierland
L	Luxemburg
MA	Malta
MD	Marokko
UK	Engeland

Below the table, there are three buttons: "Add" (with a green plus icon), "Delete" (with a red minus icon), and "Edit" (with a blue pencil icon). A vertical scrollbar is visible on the right side of the table.

Breeds

The screenshot shows a window titled "Breeds" with standard window controls (minimize, maximize, close) in the top right corner. It contains a list box with the following entries:

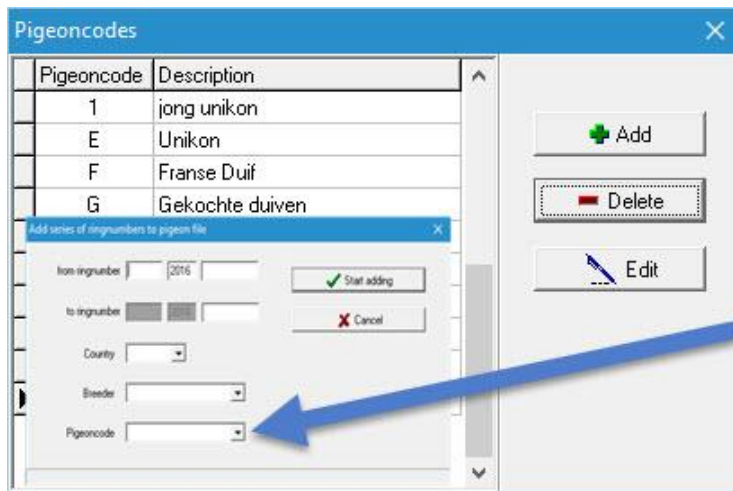

- Breed
- J Aarden
- J.Aarden v. Wegen
- JAarden- Brugman
- Jansen Verbart
- v.Wanruij J Aarden

Below the list box, there are three buttons: "Add" (with a green plus icon), "Delete" (with a red minus icon), and "Edit" (with a blue pencil icon). A vertical scrollbar is visible on the right side of the list box.

Pigeoncodes

Enter the the pigeon codes you often use.

The colours will appear in the colour list box of the pigeon window.

For here the dove codes commonly used in, see for example from you can also add an equal pigeon code if you add a ring array of such youngsters.

There are 2 possible causes that prevent you from entering the menu items

1st Compustam 2020 is the last time incorrectly closed. Some files have been corrupted. You must now first 'index files' in with menu item File run to repair the files of Compustam 2019. 2nd It is also possible that an incorrect registration file has been loaded. Please re-enter the data of the registration form into Compustam 2020 that you received at the Compustam 2020 -Cd. You can not use a registration file of another version.

If these options do not offer any improvement, please make a 'security data' and contact us via the email address below. Mention your member number-name-address-details-telephone-e-mail address. Describe your problem and also send the file 'security data' (**Winstam9.bck**) with the e-mail as an attachment.

Send the problem file to Compuclub (e-mail)

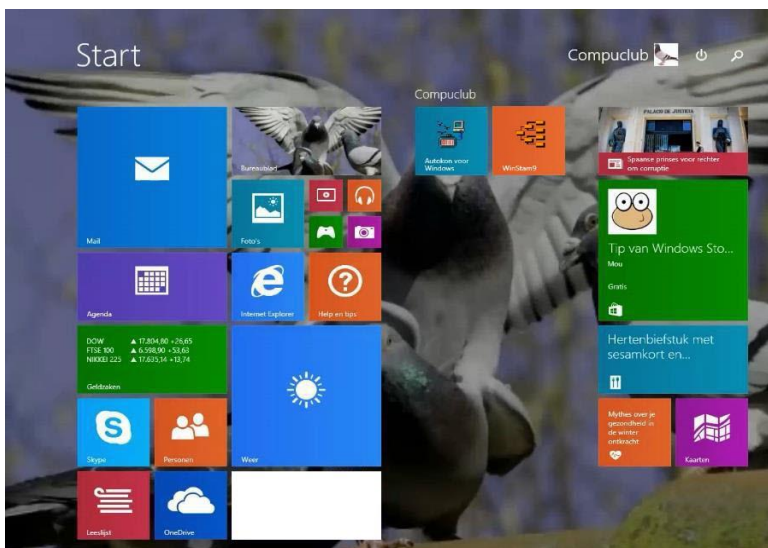

error messages in Compustam 2020 Windows 8.1 operating system

FAQ

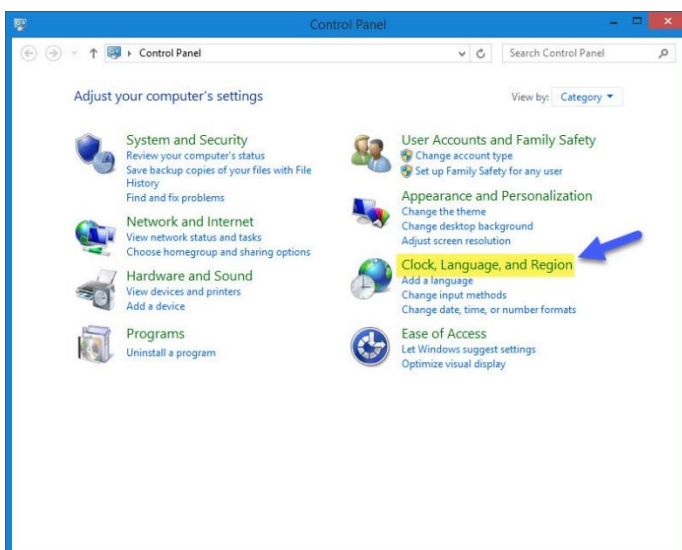

The following error messages may occur in Compustam 2020 for Windows 8.1

1. In the making of a protection, the following error may occur the message eg 30/05/2019 is not a valid date if you want to restore. backup
2. When requesting performance, the same error message will be displayed. eg 30/05/2019 is not a valid date.

The solution for Windows 8.1 operating systems

Type **Control** and press enter following screen appears

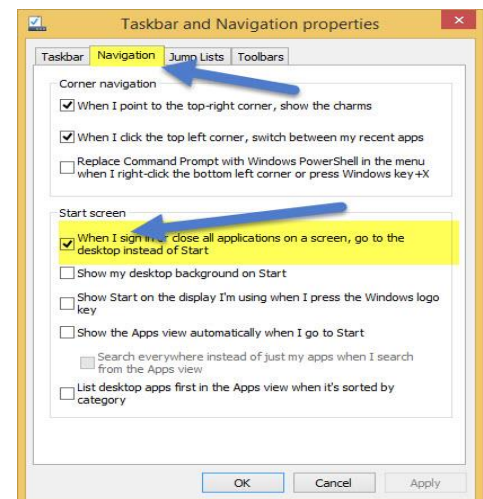

click on clock language and Region

Skip Windows 8.1 Metro interface

In Windows 8.1 you can directly go to the desktop like in Windows Vista and Windows 7

Right-click any ware on the taskbar and choose Properties

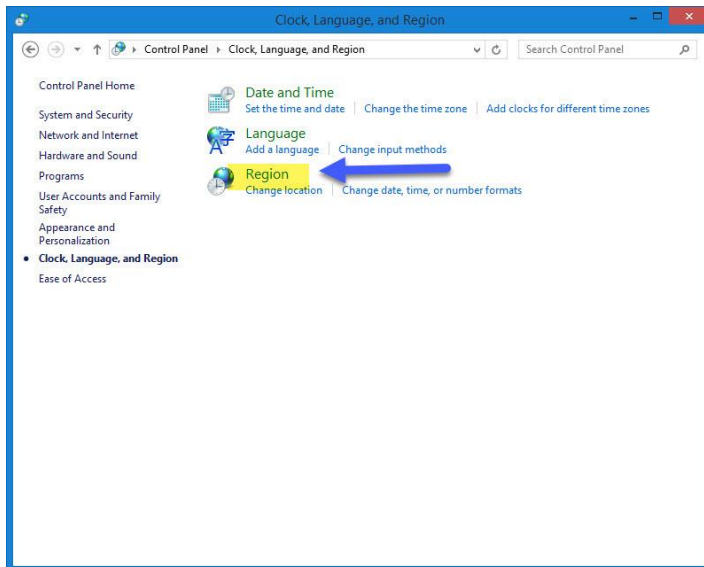

Click the tab navigation and click under the heading Home screen. Now the Metro interface on Windows 8.1 will be beaten **Do not forget to click Apply**

Possible error message after upgrading from Windows 7 or Windows 8.1 to Windows 10

After upgrading from Windows 7 or Windows 8.1 to Windows 10, the following error can occur during startup of Compustam 2020

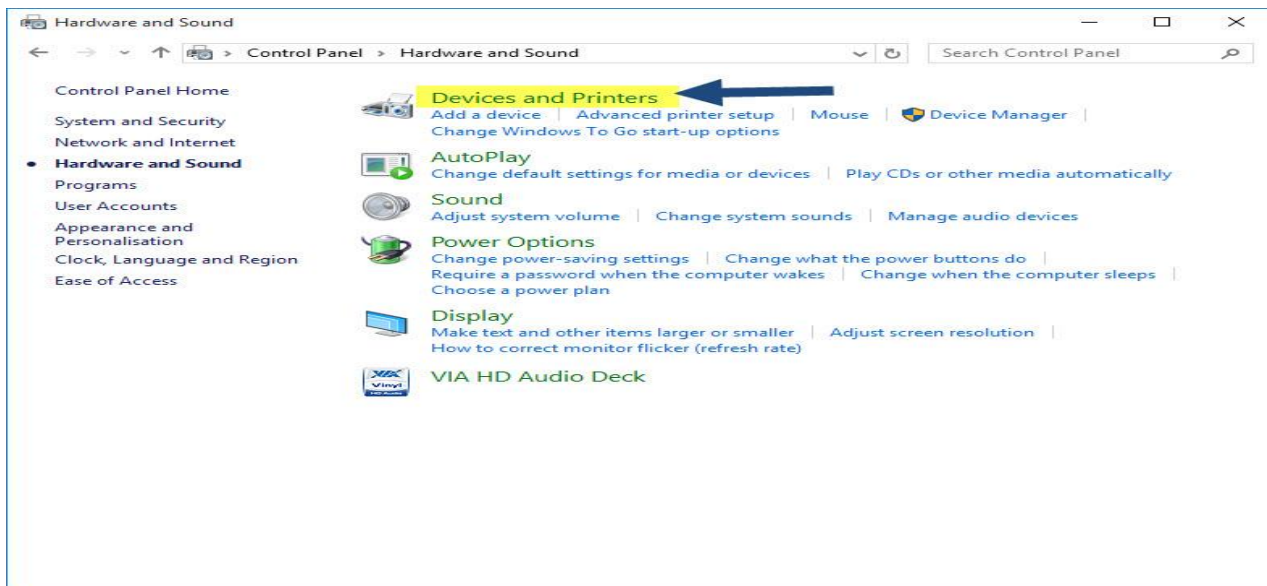

This is because there is no default printer set in Windows 10. To resolve this by clicking the Windows Search button, Type Control Panel, then Hardware and Sound

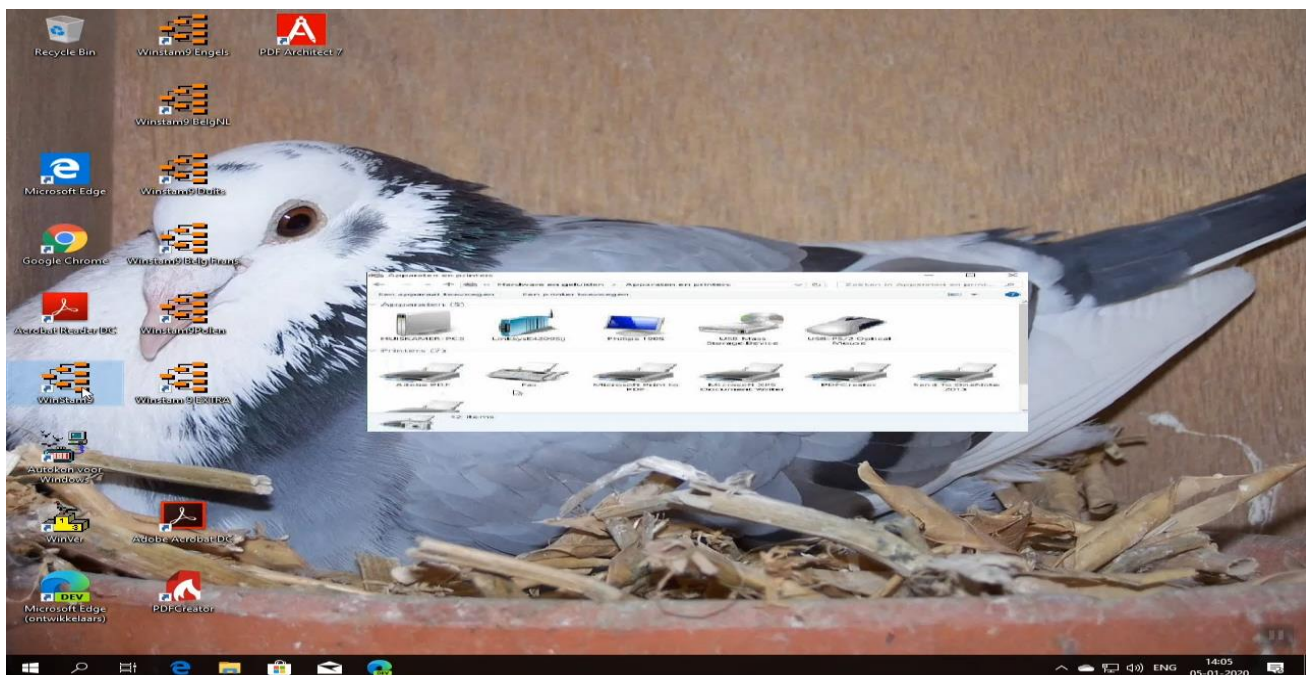

Possible error message after upgrading from Windows 7 or Windows 8.1 to Windows 10

Go to Devices and Printers

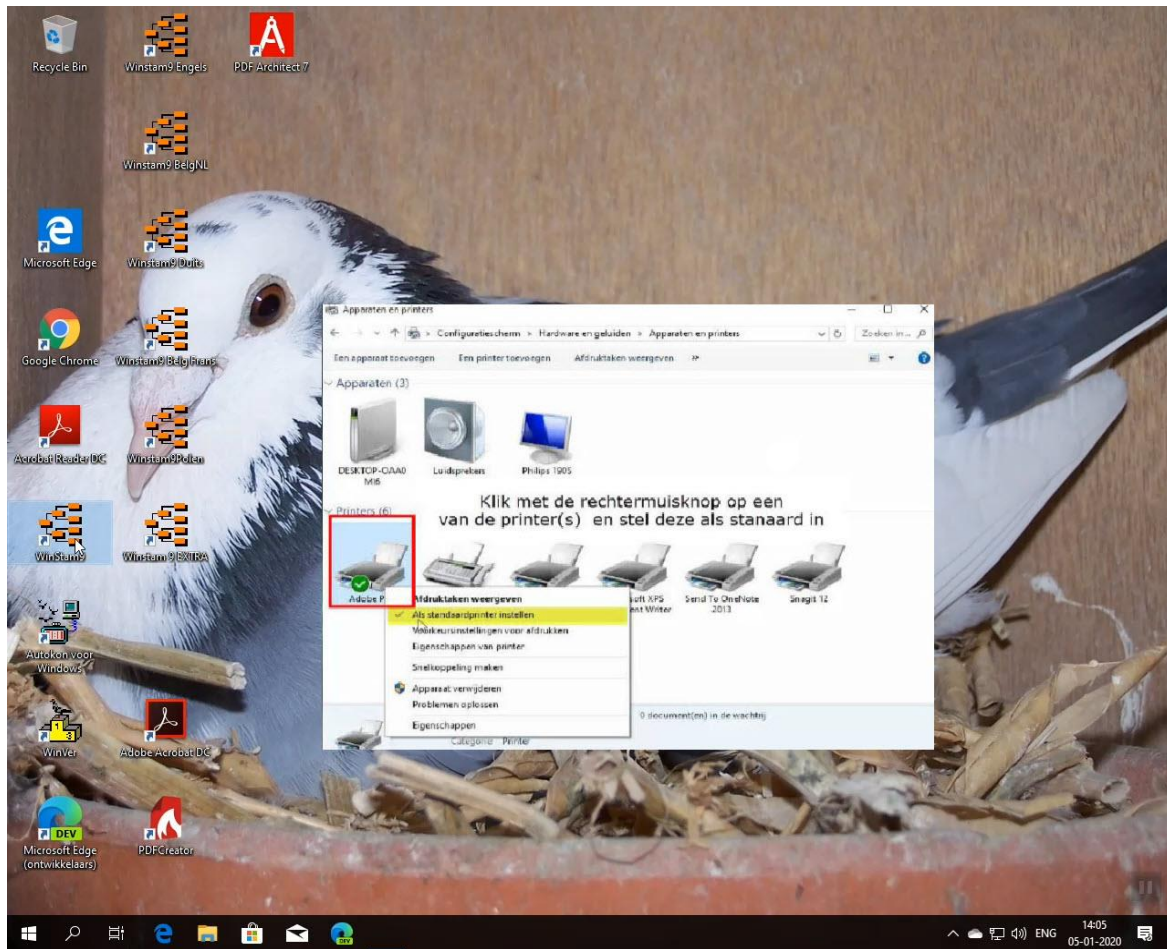

Click on one of the printers printers to right and set it as the default printer

Tip: This can also occur in Windows 7 or Windows 8.1 eg after an update of a printer driver. Follow the same steps in Windows 8.1 and Windows 7 click on the start button and go to printer devices, and to set a printer as the default

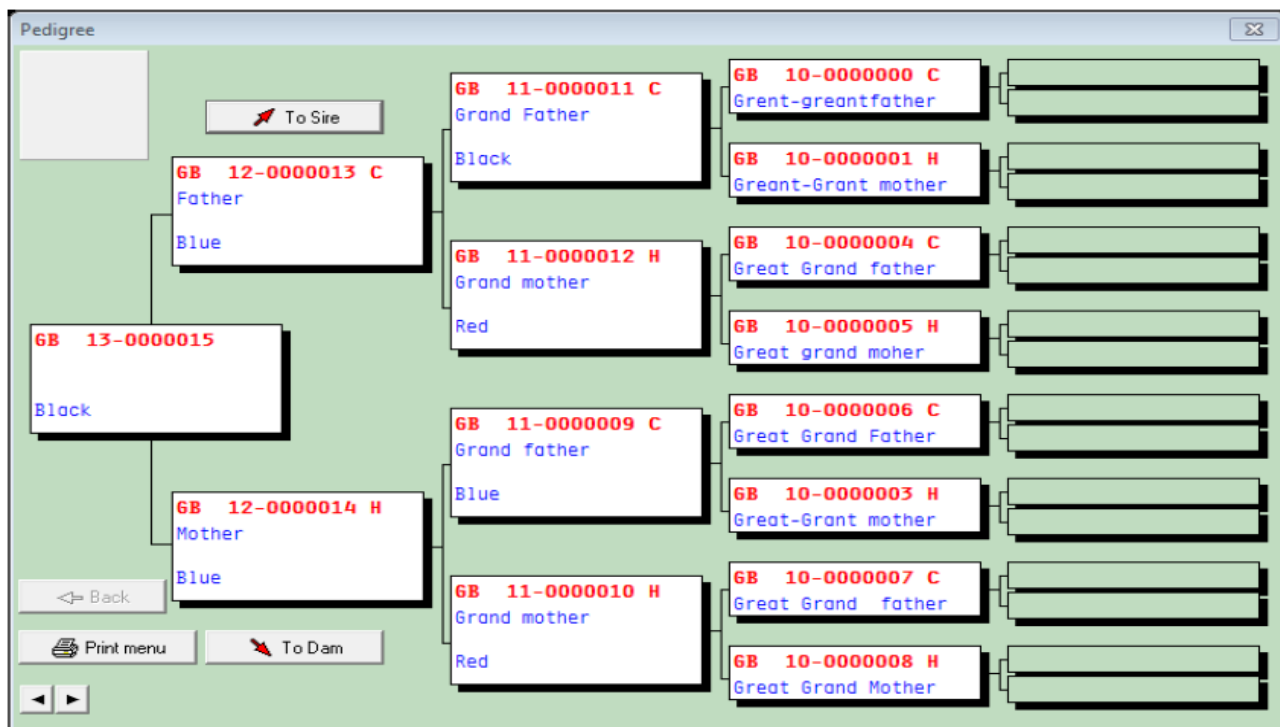

Possible error message after upgrading from Windows 7 or Windows 8.1 to Windows 10

Tip: This can also occur in Windows 7 or Windows 8.1 eg after an update of a printer driver. Follow the same steps in Windows 8.1 and Windows 7 click on the start button and go to printer devices, and to set a printer as the default

Suppose you want to enter a new tree of a dove. Unlike previous versions, there is now an easier way to fill the pedigree. fill example the (boy) pigeon data inch ringnr parents. You then click on the "Calculate" button you will see a green screen. Where the boxes are white with red ringnr's you can double-click, you can then proceed to fill in the data and then close that window by means of the cross right window. This repeat until the tree is filled completely. You must when editing the data pigeon ringnr's parent already enter then you can get them off of pedigree double-click to edit the dove further

In the old way, you can of course they still fill as listed below

This example pigeon has a pedigree of four generations.

Generation 1: pigeon itself (young) 1x
 Generation 2: Parents (father - mother) 2x
 Generation 3: Grandparents (grandpa granny paternal grandfather grandmother Mothers side) 4x
 Generation 4: About Grandparents (father, mother, grandpa, father-mother grandmother) 8x
 see example below:

Back to FAQ

How do I start making a new tree

FAQ

Then follow the steps below.

- 1. Start Compustam on.
- 2. Click on "Pigeons"
- 3. click on "Pigeons data"
- 4. Click on the button "Add"
- 5. Enter the full pigeon data. Click [HERE](#) for a description

Start entering as ringnr 0000001 in example pedigree. Then with 0000002, 0000003 etc. If you are at Ring number 0000009, you can search the parents there, because you have already entered. Looking for the parents do through the binoculars see example below.

The screenshot shows a web form for entering pigeon pedigree data. It has two main sections: 'Sire' and 'Dam'. Each section contains a 'Country' dropdown menu (both set to 'UK'), a 'Ring #' input field (both empty), and a 'Ring #' input field (both containing '2019 0000013' for Sire and '2019 0000014' for Dam). To the right of each 'Ring #' field is a binocular icon. Below the 'Sire' section is a 'Father' label, and below the 'Dam' section is a 'Mother' label.

Tip: It is best to proceed in this manner through the binoculars to look up the pigeons. If you directly type the pigeons go wrong and no good strain bean shown. If you look up the birds with binoculars, the link is made well and also display the country codes directly and the good of it as a tree also makes use. Good country codes If you have entered this country codes once good and you make with one or more pigeons loft list then they're even good to use for your electronic click. see the following sections for more information

Back to FAQ

I enter the parents, but i do not see them on the tree

FAQ

This is often a mistake when entering the parents. Here are some tips:

- In the edit screen pigeon data is probably an incorrect country code among parents in the 1st box. So, this is not allowed. Click [HERE](#) for further explanation

I get the year 2099 instead of 1999**FAQ**

Your date setting in Windows is not good. Click [HERE](#) to see the correct setting. After you create the right setting, you must remove the incorrect years (eg 2099). This is done by removing performance date.

Click [HERE](#) for more information about removing performance by date

I get an English-language error message when I want to go to a subject

Probably your system has stalled once or there has been a power outage. You can index with 'files' in the File menu restore your files.

Click here for more information

If I print lists there are columns outside the paper**FAQ**

You must check the box in the user settings tab fonts. Monitor the correct font If the defect is not resolved, you have to install font Orator 10 Pitch Again This font can be found on the installation CD Compustam. To install under Windows 95/98 this font, insert the CD into your CD-ROM on the main screen of the Windows "Start" button bottom left of the screen. Then go to Settings - Control Panel - Fonts

Look at the list of fonts or font "Orator 10 Pitch BT" already exists. If the font already exists should be by right-clicking on them first removed and in the menu, that pops open "Delete" button. Then confirm by clicking. "Yes" to

Select the top of the screen "File" and then "Install New Font" Select at stations for your CD-ROM letter designation (usually D or E) Double in folders on the FONTS folder

In "List of fonts" top of the screen "Orator 10 Pitch BT (TrueType)" is displayed. Click this font and then press "OK". You can now check "Orator 10 Pitch BT" is indeed added to the window with the fonts.

In Compustam for Windows you now have the ability to set large so your lists remain within the paper.

Font in Settings Tip:

I cannot find the pigeon with the search option

FAQ

Through the binocular you can look up the pigeon in the file. This is done by the last three digits of the number ring types.

Tip: If you enter the last 3 digits but the pigeon is still not to set the search function on from 1900 sex:

all selection pigeon code OFF (unchecked)

Start selection

then select the appropriate dove right as Compustam several pigeons find and click OK

Find ringnumber

New in Compustam 2018

You can now directly new race, colour, pigeon breeder code and country to adding the pull-down menu, click on new.

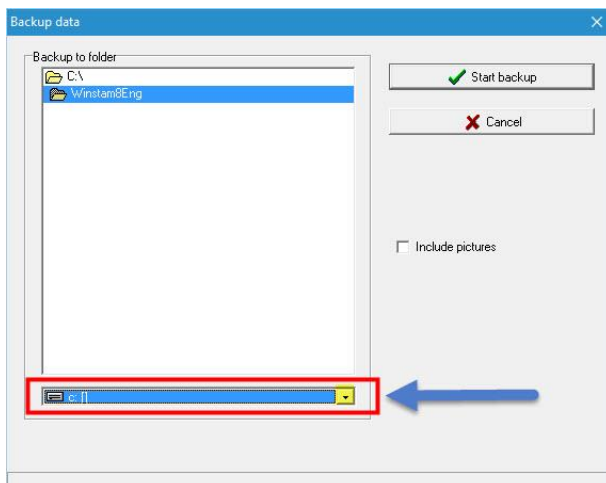

A backup or restore on a USB stick is fairly easy, but you do have to think about the following things. If you have booted Compustam connect it off through menu item File, then close or click once on the red X in the upper right screen.

Insert your USB drive into your PC or laptop and wait for the USB stick is visible, the drive letter may vary by PC or laptop

Start Compustam and go to menu item File> Backup Data> Backup

The following screen appears

In the bottom bar, you can through the triangle to select the correct drive letter (in this case, E: \) But it can also be a different drive letter varies by PC or laptop

If you have selected the correct drive letter (USB stick), click Start Security
Back-up system is the same way but then choose
File> Data Security> Security restore

Create security on a USB stick

Insert the USB stick and wait until it is visible. Follow the instruction data security. Note: Looking at the bottom bar on your USB stick, you can now create a security or set back

Exchange data to a USB stick how do you do that?

FAQ

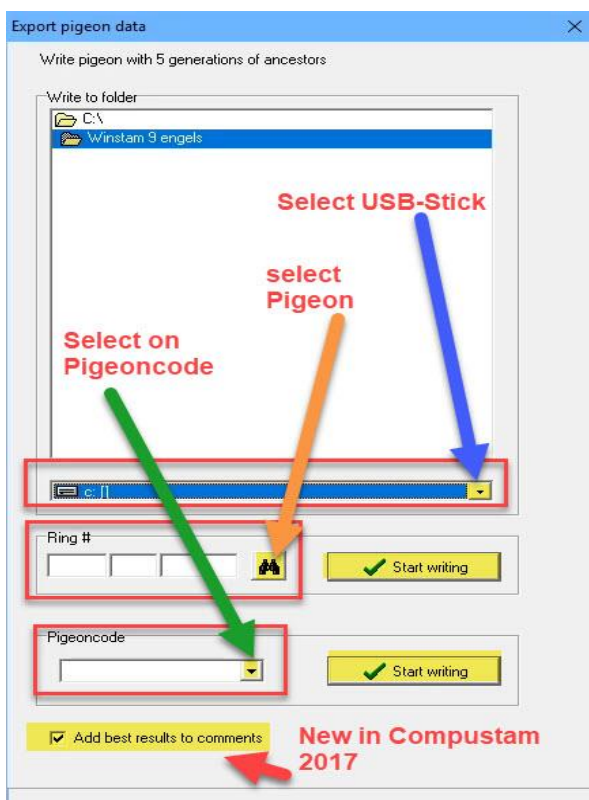

Exchange data (pedigree) on a USB stick is fairly easy, but you do have to think about the following things. If you have booted Compustam connect it off through menu item File, then close or click once on the red X in the upper right screen.

Insert your USB drive into your PC or laptop and wait for the USB stick is visible, the drive letter may vary by PC or laptop

Start Compustam and go to menu item File> Exchange Data > Export Pedigree Data

The following screen appears

In the bottom bar, you can through the triangle to select the correct drive letter (in this case, E: \)
But it can also be a different drive letter varies by PC or laptop

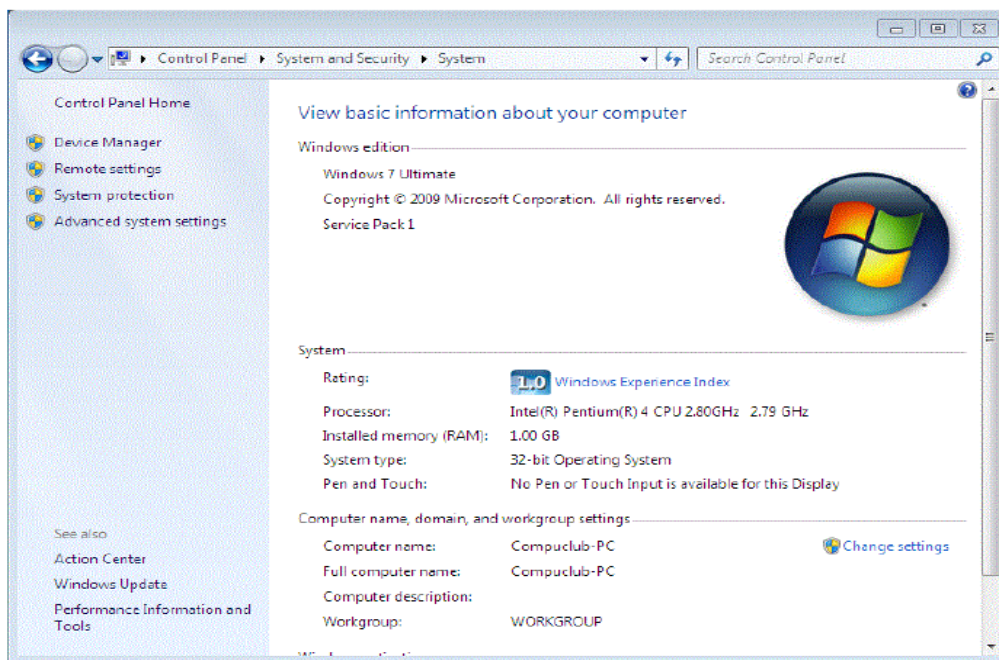

If you have selected the correct drive letter (USB drive), you can choose to export the tree by pigeon this bird you can look in your pigeons by using the search button (verrelijker) and Start Writing button.
The bottom option Pigeon code then you can select a pigeon code and export these pedigrees at once (If you are growing for someone else eg see tips and tricks of Compustam)
Import data (pedigree) is the same but choose
File> Data Exchange Data> Import pedigree

Create security on a USB stick

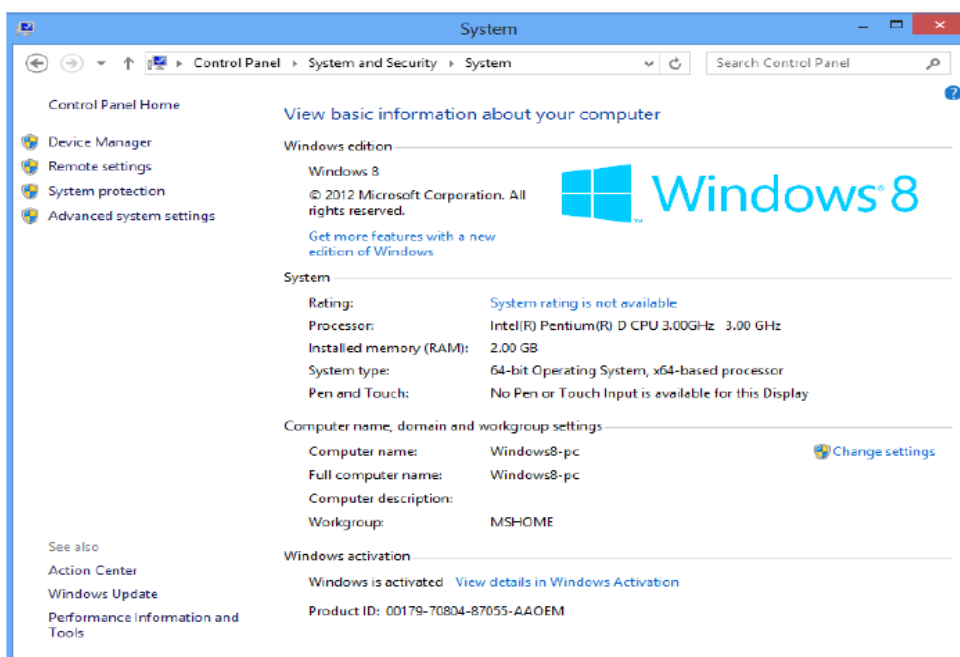

Insert the USB stick and wait until it is visible. Follow the instruction data security. Note: Looking at the bottom bar on your USB stick, you can now create a security or set back

Make sure you if you contact Compuclub you to hand the following information:

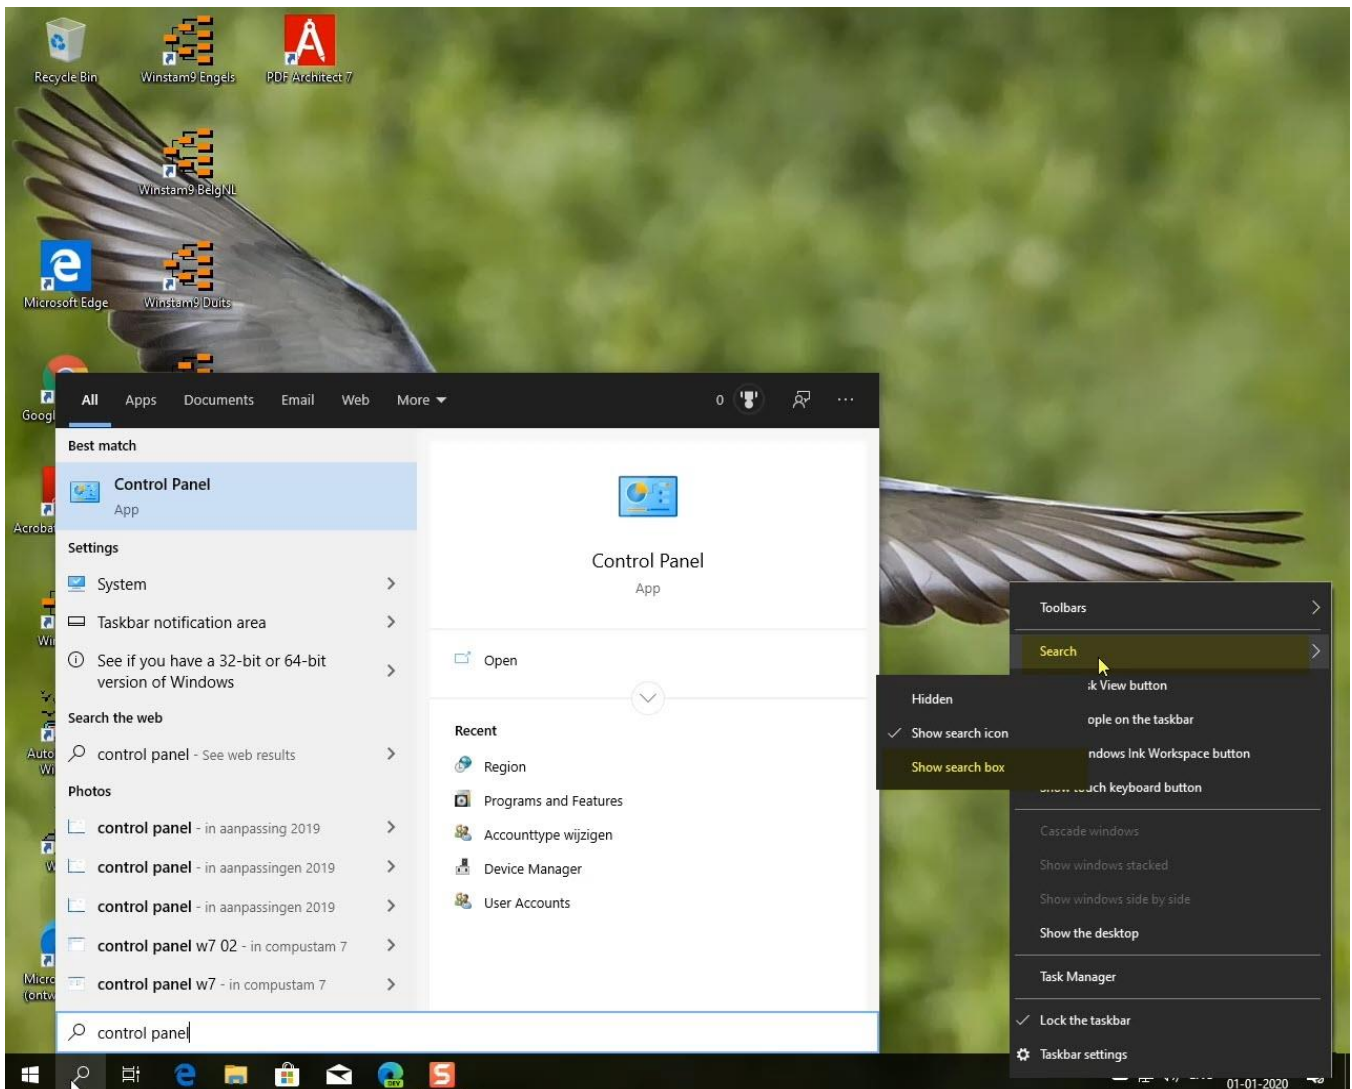

-The correct version number for Windows Compustam, so do not Compustam 2018 but Compustam 2020 release 9.26 What kind of system do you use? - How Much Is Your Bit OS (Windows 7 and Windows 8) What is the exact error message (if applicable-What has changed since the last time everything worked-What? Have already done to fix the problem in Windows 7, click on start> Control Panel> System and Security> System the screen below appears

from Windows Start screen type **“Control”** and press enter, then you click on System and Security and then System

From Windows 10 go to search in Windows 10 as seen in the image below Windows 10 type "Control panel " and press enter (then click System and Security System then the following screen appears
