

Compustam 2018

New!!!

Now available the new version 2018.
In this version many new features have been added for you as pigeon fancier to enjoy your sport even more.

New in version 2018:

Your pedigree in the Cloud

- Upload pedigree data to compustam-cloud.nl to view them anywhere in the world in 2018

Results

- Search for best performance of brothers and sisters of a pigeon
- When exchanging pedigree data, the best results add to comments
- Search for best pigeons can be searched simultaneously in several directions
- Performance per pigeon show all levels simultaneously

Print options

- Stamps with pigeon picture in each pigeon compartment
- For font card the font style is adjustable for ring number, pigeon name, breed, and breeder
- Two free fields on the basis card for e-mail address and website for example
- In pedigree cards, pigeon name, breed and breeder can be printed in a different color Hen screen

Pigeon screen

- in pedigree card 3 generations and 4 generations extra are the fields of the first 2 generations enlarged with 6 extra rules
- When introducing new pigeons, country code is automatically fetched Id. with the standard country code
- In screen Pigeons selection in the loft

Pair and breeding

- List row by batch can be sorted by date Ei-1
- If importing young pigeon in breeding data already exists, an error message is displayed with which coupling number, bin number and round number this hears
- Function in the 'File' menu and screen-breeding-breeding to update the box and loft in pigeon data
- When inserting a pair, the loft and bin number is updated in pigeon file
- In case of couples searching for shortened ring number of father and mother
